# Mondale Spells Out Plan to Cut Deficit, Challenges Reagan

PHILADELPHIA — Walter F. Mondale spelled out Monday his plan to reduce the federal deficit and, challenging President Ronald Reagan to do the same, said, "You can't hide your red ink with any more blue smoke and mirrors."

Mr. Mondale's plan would bring the deficit down to \$86 billion by 1989, in comparison with a deficit for the current fiscal year that the administration is estimating at

The Mondale plan calls for \$85 billion in tax increases, with all the new revenue earmarked for cutting the deficit. It also includes net spending reductions of \$75 billion and an estimated \$17 billion in rev-

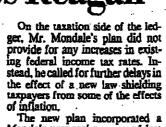

growth. On the spending side, the largest \$100,000 would pay \$2,600 more in item of savings is \$51 billion in taxes.

brought him a temporary, unbalanced, election-year recovery — space, and a happy talk campaign." Mr. He has also pledged to streamMondale said in a statement. "The line the Defense Department's price will be a postelection catas weapons procurement program. trophe for us and our children.

"I challenge Mr. Reagan to stop avoiding the deficit issue and start telling you what he intends to do about it. Mr. Reagan, all my cards are on the table - face up. Ameri-

cans are calling your hand."

Mr. Mondale said his own budget would follow the principle of pay-as-you-go. There will be no new spending without an ear-marked new source of revenue," he marked new source of revenue," he marked new source of revenue," he

Mondale proposal announced last January, under which he would raise \$60 billion in new revenues by 1989 by imposing a 10-percent sur-charge on those earning more than \$100,000, a cap on the final year of earning above \$60,000, and a 15percent minimum tax on corpora-

Marshal Sergei F. Akhromeyev, who Thursday was named chief of staff of the Soviet armed forces, is interviewed in Moscow. At right is Georgy M. Korniyenko, first deputy foreign minister. The interview was conducted in Moscow by Bryant Gumbel of NBC-TV.

# Moscow Indicates Gromyko Is Willing To Meet With Reagan After UN Visit

WASHINGTON — A senior Soviet official said Monday that Foreign Minister Andrei A. Gro-myko would be willing to meet with President Ronald Reagan in con-junction with the Soviet official's trip to the United States this month for the opening of the United Na-tions General Assembly session.

"In the past there was a tradition that Mr. Gromyko, while on a visit to New York, also visited Washington for a discussion with the president," said Georgy M. Korniyenko, Soviet first deputy foreign minister, in an interview from Mos-

cow on NBC television. "This tradition was violated in recent years, not through our

fault," he said. "And if this time they think it proper in Washington return to that practice, then I believe that there will be no diffi-culties on our part."

At the White House, the press spokesman, Larry Speakes, said that Secretary of State George P. Shultz would meet with Mr. Gro-myko at the United Nations and President Reagan "may or may not meet with other leaders who are visiting the United Na-

Mr. Speakes said no Reagan-Gromyko meeting was now sched-uled but that "the president thinks a high-level dialogue is a way to resolve differences and move forward in U.S.-Soviet relations."

Mr. Gromyko met in October 1978 with Secretary of State Cyrus R. Vance and then with President Jimmy Carter.

Mr. Korniyenko was asked staff since 1977. whether he thought it would be a good idea for Mr. Reagan and Mr. Gromyko to meet. "Meetings of statesmen are al-

ways useful in cases where there is no convergence of views," he said. Asked whether the Soviet president, Konstantin U. Chernenko, Marshal Akhromeyev said: "Kon-

"I believe that you are not quite share, in this case, the opinion of the president."

The Soviet official discounted the value of a simple get-acquainted session by the two presidents. Mr. Korniyenko said that he be-lieved that in "the present state of Soviet-American relations" such a

meeting was "necessary." However, he added, "we need a well-prepared meeting" that offers a chance of making progress. Otherwise, a meeting might not simply be useless but could conceivably cause damage, he said.

Marshal Sergei F. Akhromeyev, whose surprise appointment as forces was announced Thursday, said on the same program that his assignment was "just a regular change" in the top ranks of the

Marshal Akhromeyev succeeded Marshal Nikolai V. Ogarkov, who had served as armed forces chief of

he decorated our cosmonauts and Foreign Ministry celebrated the he is working now."

North Korea Opens Drive to Attract

**Investments by Foreign Companies** 

# **East Germans Reassert Desire for Bonn Ties**

By James M. Markham

New York Times Service BERLIN — While belatedly empolicy, the East German Communist leadership appears determined to continue to maintain its working relationship with West Germany.

According to Western diplomats and officials in East Berlin, Erich Honecker, the 72-year-old Com-munist Party leader, does not want to allow his postponement of a visit to West Germany to lead to an unraveling of ties between the two

"We are now following a policy "We are now tollowing a poucy of not letting the damage become any greater," said an East German policymaker. "The damage is already great renough. We want to stabilize our relations in a complimated international environment." cated international environment.

German politicians and propagandists have started accentuating the Soviet theme of West German "revanchism," a purported wish by Bonn to reinstate the borders of the German Reich, and are putting new emphasis on the need to halt the deployment of North Atlantic Treaty Organization nuclear weapons in the Federal Republic.

While not breaking contacts with West German politicians, the Hon-ecker regime evidently intends to stress links with the opposition Social Democratic and Greens par-NATO missile deployment.

bracing some of the accents of the cratic anti-missile activist, the day man party leader to West Germa-Soviet Union's hard-line foreign after the Communist leader can-ny. celed his West German visit.

to Western diplomats, seems to be twofold. On the one hand, it might serve to encourage the enfeebled West German anti-missile movement, which this month plans to stage demonstrations to disrupt NATO maneuvers near the East German frontier.

A second and perhaps more important aim is to strengthen the hand of those like the Social Democrats and the Greens who contend that it was not so much pressure from Moscow as an unwillingness by Bonn to make concessions to Mr. Honecker that persuaded him to postpone the trip.

At the same time, however, East ment in West Germany might make Chancellor Helmut Kohl more amenable to concessions if the visit is eventually rescheduled. [Following the postponement Sunday of the visit to West Germany of President Todor Zhivkov of Bulgaria, Romanian sources in Bonn said they had no doubt that President Nicolae Ceausescu would defy Moscow and visit West Germany next month, United

Press International reported. f"We make our own policy." Romanian diplomat told UPI.] A consensus among senior West-

But, by some accounts, Mr. Hon The goal of this tactic, according ecker may have encouraged to push forward with plans for the trip by conflicting signals from a divided Moscow leadership.

Mr. Honecker met with the Soviet president. Konstantin U. Cher-nenko, in Moscow on June 14 and, in the view of a diplomat, "would never have gone forward with the plans for the visit if he didn't think

he had Chemenko's approval." But Mr. Chernenko slipped out of public view during the summer just as the strident Soviet "revanch ist" campaign, widely seen as the handiwork of Foreign Minister An-drei A. Gromyko, intensified.

Under Soviet pressure to call off the visit, Mr. Honecker continued to negotiate, through his envoy in Bonn, such issues as the details of a joint statement he and Mr. Kohl would issue and protocol matters such as a possible reception by West Germany's president. Richard von Weizsacker.

An East German official said of was "too simple to say that Mr. Honecker just gave in" to Soviet pressure. Rather, this official suggested, the East Germans were probing the Kohl government up to the last minute to see if it might concede enough to make it possible ties, which have opposed the ern diplomats here is that pressure to persuade the Russians that the from Moscow late this summer was visit would be worthwhile.

# Quiet U.S. Overtures to East Europe

# Contacts Are Quiet to Avoid Soviet or Domestic Reaction

By Don Oberdorfer Washington Post Service

WASHINGTON — At midday last Tuesday a high-powered group headed by the State Department's third-ranking official, Michael H. Armacost, undersecretary for political affairs, attended a luncheon given by Ambassador Gerhard Herder of East Germany.

The occasion was the 10th annial to meet, Mr. Korniyenko recarries out his functions. And I can with one of Eastern Europe's most

correct in saying that President Reagan expressed a desire to meet. He always added that a meeting should be well prepared. And we stated that, After his rest, ranking official of the East German same occasion at the residence of

the U.S. ambassador, Rozanne L Ridgway. In about three weeks, this unusually high level of contact is sched-

uled to be carried higher, as Secretary of State George P. Shultz confers in New York with the East German foreign minister. Oskar Fischer. The meeting will be the first between the chief diplomats of the two governments in six Years. The State Department is now se-

Shultz, in about three months, that would be an even more important symbol. Officials said Mr. Shultz might go to Yugoslavia, Romania and Hungary in December.

The intensified official contact is part of the U.S. response to growing signs of political and ideologi-cal differences between Moscow and its Eastern European allies. Eastern Europe's tugging at

Moscow's leash was recently illustrated by the dispute over the proposed trip of the East German leader, Erich Honecker, to West Germany, which had been planned for late this month.

Last Tuesday, the same day as the U.S. luncheons, Mr. Honecker in their interest." bowed to Soviet pressure by postponing the trip. However, that acponing the trip. However, that action was taken after more than five weeks of unusual public jockeying the State Department that revolutions are impending in Eastern Europe. between Moscow and East Berlin

How the United States can take advantage of the trouble in the Sodiscussion in administration policy-making circles.

Much international attention was given to the Aug. 17 public statement of President Reagan, ad-

dressing Polish-Americans at the section article a week ago, three White House, that the United States rejected any interpretation of the 1945 Yalta agreement "that suggests American consent for the division of Europe into spheres of influence" and to Mr. Shultz's In the 1970s, North Korea went 20 that "we will never accept the on a buying spree in the West, idea of a divided Europe."

# Communist Party Formed In Ethiopia

ADDIS ABABA, Ethiopia Lieutenant Colonel Mengistu Haile Mariam, who has lead Ethiopia since the overthrow of its feudal monarchy 10 years ago this week, was elected Monday head of the country's newly established Com-

munist Party.
Colonel Mengistu was elected secretary-general of the Workers Party of Ethiopia, which was formally established Monday following a five-day founding congress.

Six other members of the ruling Provisional Military Administrative Council also were elected to posts in the new party, which will have a Soviet-style Politburo, Central Committee and Presidium.

It was not clear if the ruling council, which has governed Ethio-pia since the 1974 revolution that deposed Emperor Haile Selassie, will automatically be dissolved or when a national assembly will be established. Colonel Mengistu has said he views the founding of the party as a first step to a Marxist-Leninist political democracy.

Total party membership was not known. Moves to establish a political party formally began in 1979 when Colonel Mengistu created the now-dissolved Commission for Organizing a Party of the Working People of Ethiopia.

The changes coincide with cele-brations marking the 10th anniversary of the Sept. 12 revolution, which ended 50 years of feudal rule during which political activity was

Colonel Mengistu and his supporters have since steered this country of an estimated 33 million people on a firmly pro-Soviet course and Ethiopia is considered one of Moscow's closest allies in

# Gale Ruptures Sunken French Ship

OSTEND, Belgium (AP) — A gale Monday broke into two parts the hull of a French freighter containing radioactive cargo, the Belgian Ministry of Environment reported, according to the news service Agence

Belga.

Salvage workers, who have been trying to retrieve the ship's 30

Salvage workers, who have been trying to retrieve the ship's 30 containers of uranium hexafluoride, feared that the storm, with 12-foot (4-meter) waves, would free the barrels from the hulk. Earlier in the day, one of the ship's fuel tanks was breached, sending an oil slick drifting toward Belgian beaches.

The freighter, the Mont-Louis, sank Aug. 25 on a sand bank in the North Sea 12 miles (20 kilometers) off the Belgian coast after colliding

### Hurd Replaces Prior in Ulster Post

LONDON (Reuters) — Margaret Thatcher, the British prime minister, named Douglas Hurd on Monday to replace James Prior as secretary of state for Northern Ireland. Mr. Hurd, 54, thus stepped up to one of the most demanding jobs in

British politics. He was at the Foreign Office in the first Thatcher government from 1979 to 1983 and was switched to a ministerial post in the Home Office when the Conservatives were re-elected in June 1983. The change was forced on Mrs. Thatcher when Mr. Prior, 56, made clear earlier this year that he wanted to quit. He was unable in three years to foster some form of power-sharing between Ulster's Protestants and

### Begin in Hospital; Surgery Possible

JERUSALEM (UPI) — Former Israeli Prime Minister Menachem Begin entered Shaare Zedek Hospital Monday for treatment of a prostate problem, a hospital spokesman said, adding that a decision would be

problem, a flospital spokesman said, adding that a decision would be made within a day or two on whether surgery would be necessary.

An aide said Mr. Begin, 71, was in good spirits. Reported for some time to be in ill health, the former prime minister has been a virtual recluse since abruptly resigning office in September 1983.

A hospital spokesman said the prostate trouble was "not unusual for a man his age." The prostate is a small gland that surrounds the urethra, the tube that drains urine from the bladder. In older men, it frequently becomes enlarged and blocks the flow.

# STE. ANNE DE BEAUPRE. Indian Troops Arrest 67 in Hyderabad

NEW DELHI (AP) — Troops arrested 67 people Monday as Moslem-Hindu violence continued in the southern city of Hyderabad, capital of Andhra Pradesh state. Police reported nine deaths, 130 injuries and more than 350 arrests in two days.

In the neighboring state of Madhya Pradesh, the authorities ordered a three-day curfew Monday in the town of Sendhwa after at least three people were killed in Moslem-Hindu clashes.

In the northern state of Punjah, troops and police arrested more than 1,250 farmers, forcing cancellation of an anti-government rally Monday, United News of India reported. The rally had been called to protest economic policy, but the government said militant members of Punjah's Sikh minority might try to exploit the protest.

### New Zealand Leader Rebuffs Party

WELLINGTON, New Zealand (UPI) — Prime Minister David Lange said Monday his government would not implement a resolution passed at the annual conference of the ruling Labor Party to withdraw from military exercises and alliances with nuclear powers.

The motion, passed Sunday, would have resulted in New Zealand's withdrawal from the ANZUS defense alliance with the United States and

Australia Mr. Lange said, "It is not the declared policy of the Labor government or the Labor Party to make a unilateral withdrawal from ANZUS."

However, a government spokesman said New Zealand would stand by its earlier decision to ban visits by nuclear-powered or nuclear-anned ships, a stance the United States sees as threatening the alliance.

### U.K. Social Democrats Bar Merger

BUXTON, England (AP) — Leaders of Britain's Social Democratic Party-on Monday ruled out a merger with their ally, the Liberals, but vowed to preserve the alliance, saying neither party could survive alone. Speeches by the Social Democratic president, Shirley Williams, and here predecessor, Roy Jenkins, appeared aimed at satisfying a growing sent-ment among party supporters in favor of a merger. "Divided, we cannot prevail in a harsh political climate," said Mrs. Williams in a speech at her party's annual conference in this town in northern England. ... I wo barnes we are

good." He declined to go further, saying, "I have no wish to see this party tie itself in knots by seeking a forced or premature merger."

### **UN-Sponsored Talks on Cyprus Open**

UNITED NATIONS, New York (AP)—UN-sponsored talks to find a solution to the Cyprus problem opened Monday with Spyros Kyprianou, the president of Cyprus, saying the aimation was "delicate and critical" and too uncertain to make any predictions.

Mr. Kyprianou, leader of the Greek Cypriot community, made the remarks before meeting with UN Secretary-General Javier Pérez de Cuéillar in the first session of the talks Monday morning. Mr. Pérez de Cuéillar was scheduled to meet with Raouf Denktash, president of the salf-modaimed Turkish Republic of Northern Cyprus, on Monday self-proclaimed Turkish Republic of Northern Cyprus, on Monday

The talks were scheduled for Monday and Tuesday with the UN chief meeting alternately with the two Cypriot leaders.

# Iraq Claims Direct Hit on Gulf Target BAHRAIN (Reuters) — Iraq said its aircraft had scored a direct hit. Monday on a "large naval target," a term it generally uses to mean an oil tanker, south of Iran's main oil terminal on Kharg Island in the Gulf. The announcement came after a two-week lull in air attacks on Gulf.

shipping. There was no immediate independent confirmation.

The last such air strike was on Aug. 27, when the Panamanianregistered Cleo-1 was damaged by a rocket apparently fired by an Iranian.

jet. The last Iraqi attack was three days earlier, when the Cypriot-registered Amethyst was hit, causing a fire which took nearly a full day to put out.

### South Africa Orders 7 Rearrested

JOHANNESBURG (Reuters) — Fresh detention orders have been issued for seven opponents of the South African government freed by a court on Friday, a spokesman for the Law and Order Ministry said.

The seven, including Archie Gumede, president of the anti-aparthod-United Democratic Front, had been held without charge since just before controversial elections to a new Parliament last month. The spokesman said all seven were at large and were being sought.

in Johannesburg's black township of Soweto, youths stoned a school and two delivery trucks Monday in continuing unrest that has claimed about 40 lives in the past two weeks, police said, and at Warmbaths, north, of Pretoria, youths set two cars on fire. No injuries were reported.

### For the Record

Canada's Liberal prisse minister, John Turner, announced Monday that Conservative leader Brian Mulroney, winner of last week's parliamentary, election by a landslide, would assume office Sept. 17. (UPI)

The Soviet Union has revoked the citizenship of Lyudmilla I. Skinner, Russian widow of a British banker, Donald Skinner, who plunged to his death in Moscow last year and who was said to have maintained contacts with the KGB and British intelligence, Moscow officials confirmed Monday, Mrs. Skinner and her two sons have lived in England since 1981.

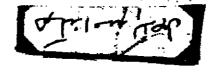

The governing Botswana Democratic Party won a strong majority in-elections Saturday for the National Assembly in one of Africa's featuriving multiparty democracies, according to results announced Sunday.

> Mr. Cox, the Pentagon counsel, called the proposal an "additional procedural requirement" on first use and contended that it would tend to undermine the North Atlantic Treaty Organization's deter-

Since the short flight times of missiles (30 minutes or less) allow little time for consultation, Mr. Stone and Mr. Berger said, the president should retain the right to order prompt retaliation, or a second strike, if the Soviet Union were to attack the United States with a first strike.

As for a conventional war, Mr. Stone's article said, it would not be decided in minutes, hours or even a few days and there would be amole time for a president to consult the proposed joint committee or even the full Congress before first use.

# U.S. Aid in Afghanistan **Gains Political Backing**

By Don Oberdorfer

WASHINGTON — The sup-posedly secret U.S. aid to anti-Sovict insurgents in Afghanistan has won increasingly prominent politi-cal support in the United States as charges are being made that the aid is insufficient.

in a change from their 1980 positions, the national platforms of both the Democratic and Republican parties recently endorsed U.S. support for the Afghan "freedom fighters." The 1984 Democratic platform even endorsed "material assistance" for the insurgents. Such aid was secretly begun in the Carter administration and has

continued in the Reagan administration, but without public acknowledgment. In late July, however, the House Appropriations Committee gave widely publicized approval to a supplemental grant of \$50 million in aid to the rebels. Lawmakers who traveled to Pakistan, where most of the exile groups are based, apparently generaled the additional assistance.

According to the Federation for American Afghan Action, a lobbying organization calling for more and better U.S. aid to the resistance, \$325 million in CIA funds has been spent on this program since it began shortly after the De-cember 1979 Soviet intervention. The Afghanistan program is the largest covert CIA operation, according to a congressional source.

Andrew L. Eiva, executive direcfor of the lobbying group and a former U.S. Army captain, charged that he found many U.S.-supplied arms to be of poor quality or in

AUTHORS WANTED BY N.Y. PUBLISHER

poor condition when he inspected them in Pakistan during 1980-82.

"Our Afghan friends, while ap-preciating the support, confirmed that the aid that has reached them was for the most part useless for their tasks," Mr. Erva told the Republican Platform Committee in Dallas last month.

After a query by The Washington Post, Mr. Eiva produced lists of arms received and distributed in Afghanistan. He said the documents had been supplied to him by one of the 10 Afghan resistance factions headquartered in Pakistan.

According to the documents, this faction received 7,577 old-fashioned Lee-Enfield rifles, 2,940 Ka lashnikov automatic rifles, 331 RPG-7 rocket launchers, 114 RPG-234 rocket launchers, 355 pistols, 108 heavy machine guns, 30 82mm mortars and 19 light machine guns in 1981, 1982 and the first seven months of 1983. Most weapons were of Soviet design or manufacture and furnished under the anspices of the CIA. Others were purchased from Chinese sources.

Mr. Fiva and other sources said that the CIA insists on supplying Soviet weapoury rather than U.S. arms in order to maintain "plausi ble deniability" that the arms to fight the Soviet military are being furnished by Washington.

The CIA declined comment on Mr. Eiva's charges. The agency cannot refute the claims of ineffectiveness without admitting participation in the resistance.

# U.S. Sees Resistance, Administrative Headaches in Revamping Education

By Edward B. Fiske New York Times Service NEW YORK — As the new school year begins, educators in the United States are engaged in a widespread attempt to improve

U.S. public education. But the magnitude of the task ahead, and resistance to the impo-sition of new policies, is tempering the excitment of such a project. The Education Commission of the States, which monitors educa-

tion legislation, calculates that at least 40 states have increased the number of academic courses required for a high school diploma, while 32 have changed curriculum standards or adopted new procedures for choosing textbooks. Two dozen states have length-

ened the school day or year, while 42 have moved to improve the training or raise the certification standards of new teachers. "It's an exciting and hopeful

each school must meet, while Vermont has a new set of specific learning goals for each subject. Virginia has new procedures for adopting textbooks and is setting up a center to evaluate educations computer software.

Virtually every state has taken up the question of how to train better teachers. Connecticut, for example, is tightening its standards for state teacher colleges and work-ing on a plan to give teachers 10 more days of training.

Twenty-three states have taken steps to increase the time students spend learning. Arkansas, for example, has increased the required instruction time from five hours a day to five and a half and, begin-ning in 1987, will lengthen the school year from 175 days to 178.

At least 17 states have taken steps to increase teacher salaries, and a recent survey by the South-ern Regional Education Board found that at least two dozen others were dealing with the issue. "There is a concerted, long-term effort to raise teacher salaries," said Mark D. Musick, a board offi-

In at least half a dozen states, including Florida, California and Tennessee, increased pay for teachers is being tied to merit pay or "master teacher" programs that link higher salaries to superior per-

Many of the education initiatives have been controversial. Teacher unions have been critical of a plan by Governor Thomas Kean of New Jersey, being emulated in half a dozen other states, to try to attract bright people into teaching by allowing liberal arts graduates to enter the field through a competency test and one-year internship rather

# Disarmament Conference To Resume In Europe

STOCKHOLM - The Conference on European Security and Disarmament resumes Tuesday with delegates doubting that its third session will bring them any closer to beginning negotiations on reducing the risk of war in Europe.

The 35-state conference, with participants from all the nations of Europe except Albania, plus the United States and Canada, began in January with a mandate to negotiate confidence-building measures in Europe. So far, it has failed to move forward from formal plenary

"We're starting from scratch again," a Western delegate said. The conference is effectively the only arms forum in which the United States and the Soviet Union are still talking to each other. Talks between the two nations on limiting medium-range nuclear missiles in Europe collapsed in December, the Geneva conference on chemical weapons was adjourned at the end of August, and talks in Vienna on mutual and balanced force reductions are deadlocked.

Stockholm's second session end-ed in July with Moscow rejecting a Swedish initiative suggesting that two working groups should be set up to deal with specifics such as notification of military exercises

and the exchange of observers.

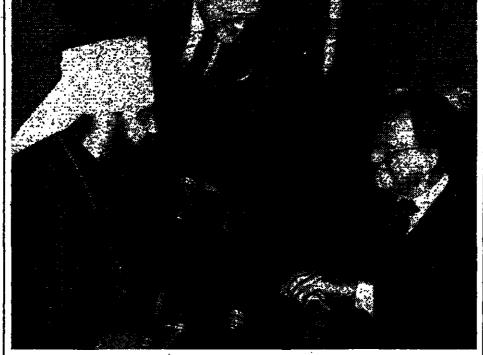

There is still a basic disagreement between East and West about what they should be discussing The North Atlantic Treaty Organization wants to discuss military mune specifics while the Warsaw Pact AIDS. wants parallel talks on nonuse of force and a non-first-use policy on

Western delegates said the inter-national situation had become more uncertain in the two months since the last session, partly because of the cancellation of planned visits to West Germany by the East German leader, Erich Honecker, and President Todor Zhivkov of Bulgaria.

bealth and standing of President Konstantin U. Chernenko also disorder. could be unsettling.

By Harold M. Schrneck Jr.

New York Times Service

NEW YORK — Scientists in AIDS has been characterized by publication in a scientific journal, but research on injection and such people as hemophiliaes who need frequent blood transfusions or blood products.

Experts are concerned over the possibility that the disease might spread more widely. The Centers for Disease Control in Atlanta, the federal agency responsible for surveillance of AIDS cases, reported recently that more than 76 percent of all AIDS patients diagnosed be-

fore July 1982 had died.

AIDS patients suffer a catastrophic decline in their immune systems, making them easy targets for infection. They also commonly develop cancers of a kind thought to be related to serious defects in immunity. Scientists believe AIDS is probably caused by a virus or viruses that deplete the immune system of important defensive cells of a class called T lymphocytes. While scientists are working in-

tensively toward the goal of developing a vaccine, many of them concede that the task may be extremely difficult because the disease presents so many mysteries and bebe effective.

search teams have been implicated recently as probable causes of

# Greeks Fear New Era of Political Feuding

By Paul Anastasi New York Times Service

ATHENS - Personal criticism by Greece's Socialist prime minister of the new leader of the conservative opposition has caused concern over a possible return to the bitter political feuding of the mid-

The tense atmosphere 20 years ago is regarded as having helped create the conditions for the start of a seven-year military dictatorship in 1967.

In a speech Sept. 2, Prime Minister Andreas Papandreou described Constantine Mitsotakis, the new leader of the New Democracy Party, as "a nightmare" and accused him of having joined with King Constantine in 1965 to overthrow Mr. Papandreou's father, George

The prime minister said Mr. Mitsotakis was responsible for the 1967 coup, the military dictator-ship and the Turkish invasion of

northern Cyprus in 1974.
"I truly believe that the fact that New Democracy's legislators man-aged to choose a nightmare for their leader is proof of their degeneration," Mr. Papandreou said. He said that, because of Mr. Mitsota-kis's record, he would not speak

with him.
"I do not intend to hold a diahis leader and his party, and who is responsible for the seven-year dictatorship and the Cyprus tragedy,

he said Mr. Papandreou's statement was widely criticized by opposition politicians and many newspapers. They feared that it could herald a return to the crisis of the 1960s and to the acrimony that has often trou-bled Greek politics.

### 2 Sandinist Aides Feared Abducted

New York Times Service BLUEFIELDS, Nicaragua — Two local Sandinist leaders were apparently kidnapped by rebels last week, and government officials

say they fear both were killed.
The incident brought to 82 the number of people believed to have been abducted by the insurgents since the beginning of July, the of-ficials said. They asserted that the kidnappings were intended to dis-courage residents from cooperating

with the government. One of the two Sandinist leaders reported kidnapped, Ray Hooker, cause it seems to begin with dam- is a former university dean educatage to the immune system, which ed in the United States. # Pan Am. First In Space.

The first thing you notice as you enter the First Class cabin of a Pan Am 747 is the extraordinary feeling of space.

# First In Comfort.

As you settle into your Space Seat, the Pan Am Sleeperette® seat, this sense of spaciousness becomes even more impressive.

In fact, when the seats are upright you'll find it nigh impossible to touch the

But above all, there's space to give you something so very rare in air travel today, a sense of privacy.

# First In Food And Wine.

All this space means more comfort to enjoy one of the greatest dining experiences in the sky. There's a tempting selection of delicious starters, sumptuous entrées, and exotic desserts.

And accompanying all this fine food are fine wines carefully selected by Pan Am. Wines that travel well, and go well with travelling.

# First To Manhattan.

But with Pan Am, First Class doesn't end when you touch down.

Awaiting Pan Am's daytime flights from Europe to New York is a free helicopter service for First Class passengers.

It whisks you to Manhattan in about eight minutes. You can also take a free helicopter to Newark. No other airline can offer you its own helicopter service.

Meeting Pan Am's 7pm flight from London is a free limousine to chauffeur you into Manhattan.

Be sure to book one of these when you make your reservation.

# First In Service.

Pan Am is proud of a 57 year tradition of fine service. Truly First Class from the time you're welcomed aboard till the time you alight from your plane, helicopter or limousine.

After all it was Pan Am that invented luxury in the air. So why not try some on your next trip to the States?

For information and reservations call your local Travel Agent or nearest Pan Am office.

# **Squandering Antibiotics**

folly, greed and neglect with which the price-less gift of antibiotics is now being squandered command almost equal awe.

Antibiotics are a uniquely potent defense against bacteria, but they possess a fatal weakness: If used to excess, their power fails. That is what is now happening because of doctors who over-prescribe antibiotics and farmers who routinely add them to animal feed.

Many disease bacteria are now resistant to six or more different antibiotics. They can be killed by others to which they have not yet acquired resistance, but the fallback anti-biotics are often more toxic and more expensive than those they replace. And there is no guarantee that there will always be new antibiotics in reserve. Some biologists fear the day may come when 80 percent of infections are resistant to all known antibiotics.

About 40 percent of the antibiotics produced in the United States are used not to control disease but because of a strange side effect: They promote growth in farm animals. All poultry and most pigs and cattle receive low doses of antibiotics in their feed.

The practice ensures the widest possible spread of resistance. With daily doses of antibiotic in the animals' feed, the resistant bacteria have an overwhelming advantage over others. The genes that confer resistance are easily transferred from one bacteria to another, even to different species.

Some European countries long ago banned

It is hard to read without wonder about the long series of unlikely events that enabled Alexander Fleming to discover penicillin. The folly accept and medically useful antibiotics from animal feed. They feared that resistance genes were being transferred from animal bacteria to those that the folly accept and medically useful antibiotics from animal feed. They feared that resistance genes were being infect humans. In 1977 the U.S. Food and Drug Administration followed suit, proposing to reserve penicillin and tetracyclines for combating disease. Farmers could switch to alternatives for promoting animal growth.

But Congress has persistently thwarted the

proposal, demanding one new study after another. Producers of feed antibiotics, a \$250million-a-year industry, contend that hospitals, not farms, are the main forcing grounds of resistance, and that it is mere speculation to suppose that disease bacteria that gain resistance on a farm ever in fact infect humans.

Just such a case has now been documented by the Centers for Disease Control. Investigating an outbreak of food poisoning in Minneso-ta, researchers traced back the chain of transmission from the patients to a consignment of hamburger, to the supermarkets where it was sold, to the meat broker, to the farm where the beef was raised. There they found that the farmer had fed tetracycline to his herd.

The frequency of traffic between the animal and human pools of bacteria is hard to assess, but it could be high. Rather than risk continued debilitation of antibiotics needed for human and animal disease, why not let farmers pay a few cents more for the available alternatives? Congress has needlessly stalled the obvious remedy for seven years. Further delay could well earn it the landmark opprobrium of helping render penicillin completely useless.

- THE NEW YORK TIMES.

# For a Policy of Aggressive Cooperation With Moscow

W ASHINGTON — The case of Andrei Sakharov and Yelena Bonner dramatizes the central question of our nuclear age: How are two nations that hold the fate of the world in their hands to relate to one another

when their ruling value systems stand at diametrically opposing poles?

During the past 15 years two sharply contrasting U.S. policies have emerged. The Nixon-Ford-Kissinger administration practiced what Richard Nixon aptly called "hardheaded detente." The tools of that policy were trade and other forms of cooperation, combined with discret pressure applied as part of bined with discreet pressure applied as part of a process of continuing negotiation.

Although it produced considerable flexibil-

ity for lateral movement, "hardheaded de-tente" could not last as a U.S. policy for the same reason it held so much appeal to the Kremlin: It lacked moral content, its goal was world order in the classic European sense. It was suspicious of internal forces seeking change that threatened established ruling elites — in the Soviet Union, Chile, wherever

Jimmy Carter remedied that defect with a vengeance. He put human rights at the center of his policy on the Soviet Union and repeatedly "punished" (a word he favored) the Soviet ets for morally unacceptable behavior. The tools Mr. Carter employed to administer punishment were, to a considerable extent, the various components of the web of interdependencies developed by Nixon-Ford-Kissinger. Under Ronald Reagan that moralistic em-phasis reached an apex with the description of

the Soviet Union as the "focus of evil." As superpower relations deteriorate and

By Spark Matsunaga The writer is a Democratic U.S. senator from Hawaii.

the arms race accelerates, the question now is:
Which approach is preferable?
Each, in my view, has serious flaws. A
behavior by cutting off contacts as "punishment" (which actually makes work easier for the police state apparatus), the United States

policy in tune with American values and in-terests needs both moral concern and tactical lexibility, both calculation and compassion. One way to serve American values and interests would be to establish cooperative activity as an overriding national objective to be pursued with calculated sophistication and moral determination. This policy would re-place the prevailing vacillation between no

In an important sense. American policy has made itself hostage to the KGB.

contacts and an uncritical pursuit of contacts that the Soviets exploit by limiting participation to party hacks. It would set strict standards for cooperation and push them hard.

A policy of aggressive cooperation would recognize that the chief enemy is not so much world communist ideology, which takes many evolving forms (China, Hungary, Yugoslavia), as it is the repressive Soviet police state, which is compulsively hostile to any evolution at all communist or otherwise.

Instead of responding to repugnant Soviet

at all, communist or otherwise.

ment" (which actually makes work easier for the police state apparatus), the United States would keep up the pressure, constantly pushing for new and expanded contacts of sub-stance in the teeth of Soviet repression. America's principal target would be the emerging scientific and technical elite, the most sophis-ticated and cosmopolitan segment of Soviet society, who enjoy the highest status and upon whom the totalitarian power structure depends for running the system.

In pursuing that target, we could expect much more support than now from our European and Japanese allies, who already favor increased cooperation and greater flexibility in dealing with the Soviets.

Would such a policy legitimize Soviet poli-cies of repression toward Andrei Sakharov, Yelena Bonner and others? On the contrary, it would be the strongest and most effective rejection of those policies.

The Soviet police apparatus thrives on iso-lation. Why assist its efforts? Under present conditions, whenever they want to tighten the screws at home they need only create an incident. We have handed them flexibility at our expense. In an important sense, American policy has made itself hostage to the KGB. A policy of aggressive cooperation might best be launched with a proposal to do something big with the Soviets. It must be a long-

term undertaking that locks them into an

expanding program of joint activity. Soviet policy-makers must find it sufficiently appealing to stay in even though the partnership places their reactionary system of internal controls in greatistic at the

controls increasingly at risk.

One promising possibility is an international manned mission to Mars in the 21st century. It could be put forward as an alternative to competing "Star Wars" space weapons systems, which would otherwise be developed in the same time frame. Unlike star wars, it would mandate ever greater openness across an expanding front, to the benefit of demo-

cratic values and interests. Joint activity on a grand scale would respond to the deepest aspirations of Andrei Sakharov. In the late 1960s and early 1970s he sought to nudge the Soviet Union in precisely that direction. Then the police apparatus moved in and re-established the "us" versus

"them" condition upon which it thrives.

"Any action increasing the division of mankind, any preaching of the incompatibility of world ideologies and nations is madness and a crime," Mr. Sakharov wrote. With such utter-ances his descent from official favor began, until, alone and isolated, he could retain his integrity only by lashing back at his captors. But we should not confuse his entrapped

response with the deep universal spirit that moved him to seek the intellectual freedom that must inevitably ensue from expanded communication and joint activity on an inter-national scale. We have it in our power to resurrect that noble spirit. All we need is the will and determination - and the leadership.

The Washington Post.

# The Same Goes for Steel

President Reagan was clearly right to deny protection to the American copper producers. To refuse to protect a domestic industry in distress is always difficult for a president, and more difficult than ever in the midst of an election campaign. But it is generally true that import quotas and tariffs do more harm than good to the economy, and the copper industry is a particularly explicit example.

The American producers argued that their markets were being invaded by subsidized copper from abroad. Subsidized or not, the imports were setting the world price. If Mr. Reagan had given the producers the protection that they wanted, the immediate result would have been higher copper prices forced on all the American manufacturing industries that use copper. That in turn would have handicapped those American manufacturers in meeting their own foreign competition. As they lost sales, they then would have come to the government for protection from imports made with cheaper copper. Far more jobs would have been lost than saved.

Protecting primary metals is always particularly dangerous. If government keeps out the crude metal because it is too cheap, it will enter the country in the form of finished products. That increases the effect on unemployment.

Mr. Reagan's next major trade decision, due later this month, will be on steel. It will be

terms of jobs, dollars and implications for U.S. industrial policy generally. But the issues will be similar. Again the domestic industry claims that its foreign rivals are subsidized. Again it seeks import quotas that would raise steel prices for American manufacturers and leave them at a disadvantage in their struggles to hold their markets against foreign competitors. A higher domestic price for steel would be welcomed by the steel makers, but it would be

a real threat to automobile manufacturers.

applies, and in which he can genuinely strengthen the economy by pursuing it. He applied the right principle in the copper deci-

more important than the copper decision in

There has been much speculation that, as a matter of political tactics, denying protection to copper gives Mr. Reagan more latitude to help steel. Mr. Reagan has always strongly advocated open markets. In view of all those speeches and statements, according to this line of reasoning, perhaps he felt that he could not protect both the copper and the steel industries - and, having to sacrifice one of them, chose the one that was less powerful and more dispensable. That suggestion seems excessively cynical, even by the standards of trade politics. International trade is one area to which Mr. Reagan's doctrine of the free market really

sion, and the principle is the same for steel.

— THE WASHINGTON POST.

### Eight years later, as I leave, there are new riots and more police retalia-tion, and more dead. Now the violence is in black towns south of here.

The focal point has been Sharpeville, where the country's black protest movement began in 1960. Why does unrest persist among South Africa's black majority — 72 percent of the population - despite

what any fair-minded observer will

TOHANNESBURG - In 1976.

J when I arrived here to take up an

assignment as the Los Angeles Times

correspondent in South Africa, blacks in the ghetto city of Soweto were rioting. The uprising spread to

other communities and more than

450 persons were killed, most of them

by police bullets.

argue has been the steady unbending of racially discriminatory policies by the white government?
There has been substantial change. Cynics snort that it is only cosmetic, a cover-up for the abrasive and humiliating treatment of blacks. But most observers hold that it is more mean-

ingful, that it allows significant eco-

nomic progress for blacks.

Black wages are catching up with those for whites doing similar work, and technical training for blacks has been greatly expanded, although still in mostly segregated schools.

True, the white government has its own interest at heart; it realizes that the country's developed industries cannot expand unless blacks are able to do more than pick-and-shovel work. Still, it is a change for the better, and one of the more reassuring by-products has been the rapid formation of black unions. Some of them already bargain effectively for

better wages and working conditions. This transformation of black workers - from second-class status in white unions, if they were accepted at all, to a point where they have their own unions with latent political pow-er — is the near-miracle I have witnessed in this country.

For Prime Minister Pieter W. Bo tha, this is the most remarkable achievement of his six years in office. He and the man who was his minister of manpower, Stephanus P. Botha By Jack Foisie

(no relation), had to steer the enabling legislation through a white Parliament steeped in a keep-downthe-blacks tradition, and then shepherd the law through the implementation stage. Conservative civil servants have traditionally tended to drag their feet when it came to carry-

ing out laws aimed at racial change. The recent unrest may stem in part from the taste of political expression allowed by the liberal new labor laws. And it may prove to be unfortunate for the prospects of getting any fur-ther such legislation.

Right-wing whites, dead set against relaxation of the apartheid format that keeps blacks segregated except in the work place, are now crowing, "I told you so." Any free-dom for the blacks, they insist, only encourages them to demand more.

Estimates of the political strength these white die-hards vary widely. The champions of white superiority range from pastors in the Dutch Reformed Church, who cite selected Bible passages to defend apartheid, to

jackboot toughs who threaten not only blacks but white liberals as well. The main resistance probably comes from rural Afrikaners who retain their Calvinist views and see blacks as no more than cheap labor.

Poll-takers have tried to assess figures. If it came to a general black uprising, something much more orga-nized than we have yet seen, all the whites would probably be united, and this is perhaps what keeps the stopper in the bottle of black unrest.

On the encouraging side, there appears to be a growing realization among urban whites that political accommodation with blacks is inevitable and that it is better to start easing into it sooner rather than later.

Mr. Botha may have strong qualms about what he has to do. He is an Afrikaner, and right-wing whites regard him as a traitor. But he is also a pragmatic politician, and he seems ready, as no South African leader

South Africa: Progress, Certainly, but Equality Keeps Receding

down the racial barriers. He has started by gingerly trying out power-sharing with nonwhite groups that are smaller in number than the 4.5 million whites. He has added two houses to Parliament, one for the "coloreds" and one for the Indians. Both groups are still diswhite resistance to racial change, and undoubtedly Prime Minister Botha has, too, but there are no accurate measure of political strength. although whites continue to dominate Parliament. Blacks still have no polit-

ical rights at all at the national level. Without trying to charm his audience, and often with a bit of testiness, Mr. Botha continues to spell out clearly in his public speeches that blacks will become voters only through the process of evolution. This grudging pace is probably another factor in the present unrest.

As the 26 million blacks become more educated - and often find themselves unemployed — discon-tent increases. In the crowded tribal homelands, to which the government consigns the majority of blacks. shortages of food, shelter and health

care become increasingly desperate. Still, revolt seems a distant thing. Only in the 1976 uprising was any nationwide organization apparent. Since then, any attempt to challenge the government has been thwarted by an efficient security police force (black men and white men alike) aid-ed by hundreds of black informers motivated by pressures or promises.

Resistance continues to be disorganized. That applies even to the most effective of the underground groups, the African National Congress.

With the exception of Nelson Mandela, an old-time dissident who has been in prison for more than 20 years and is now only an inspirational symbol of resistance, the black protest leaders tend to disdain co-operation. Sometimes this is due to tribal differences. The other basic factor seems to be ambition.

The rural politician Gatsha Buthelezi, leader of the five million Zulus, is despised by urban black leaders and taunted by Oliver Tambo, head of the externally based African National Congress. They say be cooper-ates with the white government, even though he has expressed stinging criticism of the new power-sharing arrangement with the "coloreds" Indians. He will not speak to Mr. Botha, nor Mr. Botha to him.

Chief Buthelezi advocates a national convention of leaders of all races to discuss the start of real power-sharing. Mr. Botha has said no. indicating that he is not ready to face the certain backlash of his white followers if he moves too quickly.

To an American mindful of the racial difficulties in his own country. and the time it took to bring about legal equality, it is still very frustrat-ing to be a reporter in South Africa. Within a year of my arrival I was being asked: When do you see either a stable and racially peaceful South Africa, or a bloody white-black con-frontation? In five to 10 years, I said then. Asked that question today, eight years later. I would again say: in five to 10 years. Such is the uncertain pace in this large, rich, fertile land.

The writer is retiring this month after more than 40 years as a reporter and foreign correspondent, the last 20 of them with the Los Angeles Times.

### Israel: 'Becoming an Illusion'

The state of Israel is in danger of becoming an illusion. For all its military prowess and its ever-expanding borders, it is a country which cannot stand on its own two feet.

Economically Israel is well on the way to the status of a U.S. client state, and even politically its future now depends as much on the whims of the American electorate as on the will of the Jewish people. The economic crisis derives from a combination of enormous defense spending, swollen further by the invasion of Lebanon and the outgoing government's accelerated program of West Bank settlements, and a series of consumption subsidies which successive Likud governments have de ployed to maintain their populari v. 🔭 have been balanced by a volume ......S. aid which has made the Israelis the most heavily

subsidized people on Earth. Now even the annual \$2.6 billion which Israel receives from the United States is inadequate. Next year Israel is likely to ask for nearly twice as much. Israel's true friends should resist such appeals. The people and politicians of Israel must bear the costs of creating a stable, self-sufficient economy capable of supporting a genuinely sovereign nation. - The Financial Times (London).

### Canada: 'Pro-American Stance'

The winning of the largest parliamentary majority in Canadian history by the Progressive Conservative Party reflects a strong desire by Canadians for a change in leadership in these times of domestic economic difficulties and international confrontation. It was a personal triumph for Brian Mulroney, who is little

1909: A Submarine Logs 600 Miles

PARIS — The submarine Calypso, command-

ed by Lieutenant Robillot, arrived [on Sept. 9]

at Toulon, having completed her long distance

sea test. She left Toulon [on Sept. 7], her itinerary being via the Straits of Bonifacio

back to Menton, some five hundred miles.

When, however, she made the Straits, Lieuten-

ant Robillot altered his helm for Genoa, a

detour which brought the trip to nearly six

hundred miles. This was done without a stop

and in the time of fifty-nine and a quarter

hours. It is also remarkable as an exhibition of

endurance on the part of the crew, for quarters

on a submarine are not remarkable for com-

fort, even with modern improvements.

known outside of Canada. He is an atypical Canadian politician because of his unabashedly pro-American stance.

— The Japan Times (Tokyo).

I have said right from the beginning that if I were chosen leader, my first obligation would be to refurbish the relationship of trust that must exist with our greatest friend, neighbor and ally, the United States of America. Period. This doesn't imply any subservience

Sniping and snarling at the United States is fashionable in some quarters in Canada. Fortunately, those quarters don't exist in the Conservative Party, and they don't exist with me. - Prime Minister-elect Brian Mulroney,

in an interview in Newsweek.

When the pendulum swings in Canada it really swings. Apart from a shattered Liberal Party. Mr. Trudeau's legacy is a much more relaxed relationship between the Anglophone and Francophone groups. This is undoubtedly a valuable inheritance, on which Mr. Mulroney, a bilingual Irish-Canadian from Quebec, is exceptionally well qualified to build. His campaign cry of "time for a change" both struck the right note and gave him a virtually blank check. His only firm commitment is to the preservation and judicious expansion of the social welfare system; unfortunately that means more spending when Canada is already chronically living beyond its means. As the untried new leader picks up his daunting burden, another conundrum arises: whether the plummeting Liberals or the rising New Democrats will win the battle to be the

1934: Russia Can Now Join League

GENEVA - The only obstacle to Russia's

admission to the League of Nations was

cleared away [on Sept. 10] when the secret session of the Council of the League agreed

that the Soviet Union should have a permanent Council seat after the Assembly, where

approval is already assured, elects it to mem-

bership. Poland voted for Russia, while Argen-

tina and Portugal preserved the unanimity by

abstaining. Russia's entry will be counter-

blanced, however, by the collapse of the "Fast-

ern Locarno" pact of mutual assistance. The Polish vote enabled Poland to reject the "East-

ern Locarno" and Warsaw also gained Russian guarantees for Polish minorities.

real opposition. Canada may well need one sooner than present appearances suggest. - The Guardian (London).

# South Africa in a Word: Official, Brutal Racism

By Anthony Lewis

of democracy and peace, but every harsh reality. That has just happened again in South Africa.

In recent days riots have swept through the black townships among mine dumps and steel mills in the Vaal triangle south of Johannesburg. At the same time a school boycott that began last January in black ghettos outside Pretoria gathered mo-mentum; more than 100,000 children

are now staying away from classes. Each event had its immediate causes. Residents of the townships were angry at rent increases imposed by officials during the summer. Black schoolchildren were asking, among other things, for the right to have their own student councils. But undemeath those particulars was a deeper reason for unrest. Only the willfully blind could fail to see it.

Human beings everywhere want to have some control of their own lives. Black South Africans are systemati-cally denied fulfillment of that ele-mental human need. They are told where they may live, confined by law to inferior schools and other facili-ties, excluded from any part in the country's politics. Millions have been uprooted and sent to distant "home-

lands" they had never seen. In the circumstances it is hardly surprising that there should be black protests. Indeed, any moderately perceptive American who visits South Africa comes away incredulous at

black restraint and patience.

Moreover, blacks have just been provoked by what they see as a piece of cynical playacting by the government. That is the constitutional change that adds to the all-white Par-

OSTON — It is the practice of Asians and by persons of mixed race tyrannical governments to talk (the "coloreds"). The transparent purpose of "the new dispensation." once in a while something pushes the as the government calls it, was to give mask aside and the world can see some legitimacy to a white political system based on race - to make apartheid more palatable.

The mixed-race and Asian communities were evidently not taken in, as a whole. Fewer than 20 percent of those eligible voted. The multiracial United Democratic Front urged abstention as the only political signal the powerless could give. The govern-ment responded by detaining dozens of the front's leaders without charge. All this puts urgent questions to

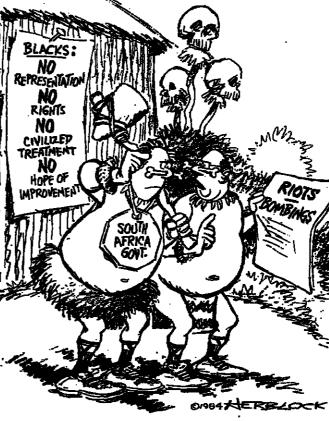

the United States. It cannot decide what will happen in South Africa, but it can make clear that Americans do not condone the evil of racism. The Reagan administration's policy of "constructive engagement" aimed to improve relations between South Africa and its black-ruled

neighbors. But the policy has been treated by the South African government as a sign of general American support - and is so seen by the government's critics. The most respected internal opponents of apartheid are bitter at the United States. The time has come, then, for an unmistakable signal of American op position to the racist system. As it happens, Congress has the opportu-

conference, the Export Administra-tion Act, includes House provisions that would impose a legal code of fair employment practices on U.S. com-panies operating in South Africa. Senate conferees have so far resisted even a modest compromise ver-sion. If they look at the reality in

nity to send that signal. A bill now in

South Africa, how can they? Discussions of South Africa often dwell on the complications of its hisliament two chambers elected by tory and racial mix. But what is really

'We've shown them nonviolence doesn't work. Now to convince them violence is no good.'

at stake is not at all complicated. It is official racism, naked and brutal. A congressional aide who has just visited South Africa for the first time, Sheldon Himelfarb, legislative assistant to Senator Charles Mathias (Republican of Maryland), saw it plain.

"I knew all about the moral dilemma of the white tribe," Mr. Himelfarb said. "I did my doctorate at Oxford, and many of my friends were South African. I had intellectualized

it. But seeing cut through the complexity. It is so simple.
"I could hardly eat in South Africa, I couldn't sleep. The immorality overwhelmed me. Maybe it's because I'm Jewish, many of my family were from Eastern Europe . . . To see race as the test . . . I met black people of great character and intelligence, and I realized they had less control of their own fate than a house pet."

credits "a revolutionary instrathe formula I became friends with boxers who had been popular, like Ronew breed of technocratic, dependand can long for less perfection and
hitting the had once a worse and the plays honest credits "a revolutionary instrution and instruction in the Synclavier II Digital hitting the bag once a week. I more personality, he plays honest Guitar." It also has another new ingredient — a young saxophone bard as any pro. When I get into attracted Davis. He became a centre other Rill Evans," much long.

yet, all have been closely associated with Miles Davis.

Despite a common name requiring qualification, Bill Evans the saxophonist has had extraordinary iuck. Their mutual friend Dave Liebman recommended Evans to Davis in 1980, only one month af-... ier he had graduated from William Patterson College in New Jerse Better stay near your phone,"
Liebman advised. Evans had been offered a \$1,000 a week job on a cruise boat. It hurt, but he turned it

Several days later, after the boat had sailed, the telephone rang, "Is it true that you play better than John Coltrane, Sonny Rollins and Charlie Parker?" Davis asked. recling like a Zen disciple, Evans answered: "I only know how to play my best." Davis laughed and invited him for dinner. Going in and out of the hospital with a serious leg infection, he was beginning to think about coming out of retire

"It just worked right away." Ev-ans recommended the guitarist Mike Stern, who Davis also hired: We started hanging out. One day Miles bought a new Ferrari. The salesman told him to take it easy breaking it in. Miles shrugged him off and put it down to the floor. We hit 80 miles per hour [130 kilometers per hour up the ramp to the East Side Drive. He was checking out the cassette machine when I saw traffic blocked up ahead. I shouted: 'Miles, break!' Later we ran out of gas on Houston Street and The Bowery. Miles kept fluff-ing off the burns who wanted money for wiping the windows. I said "We're going to need those guys, Miles." Finally he gave them a cou-ple of bucks and they went to get

It is tempting to recount more of his Miles Davis anecdotes, but the point is to ask why this reclusive. omewhat wizened black superstar would spend so much time with a 22-year-old clean-cut suburbanhred college-educated white boy from Clarendon Hills, Illinois. "I used to ask myself, 'Why me?"
When Evans told Herbie Hancock, an earlier Davis "discovery," that Miles mystified him, Hancock replied: "Join the club."

Perhaps opposites attract, perhaps Davis wanted to be nourished by youth, informed about young ustes, maybe he needed an acolyte, though Evans says: "I never thought much about Miles in college. For me he was a guy who played rock and had retired in

Once the relationship was estabiished, boxing cemented it. Evans had been working out with weights every day for years, and Davis is a

player who may not be known as "the other Bill Evans" much longer.

It was the name of a late great pianist who was often confused with the pianist and composer Gil Evans, it is a common name to begin with, and, more confusing that the pianist who was doing lots of Elektra/Musician, which hired a player who may not be begin with, and, more confusing the confusion who was doing lots of Elektra/Musician, which hired a player who may not be begin with, and, more confusing the confusion who was doing lots of Elektra/Musician, which hired a player who may not be begin with a late of the player who was a late of the player

Bill Evans: "Music that has organic personality."

### The Alfred P. Sloan Fellows Program Massachusetts Institute of Technology

A twelve-month program leading to a Master of Science in Management for U.S. and international industry and governmen executives. A Health Management option is also available.

Applicants should be in middle to upper-middle management or staff positions with approximately ten to twelve years of

Applicants are nominated and sponsored by private and public sector organizations, selected by MIT, and appointed Alfred P.

We are actively seeking to increase the number of qualified women in the program.

For further information on this program and our other Continuing Education Programs in Management, please contact: Alan F. White, Director of Executive Education, Alfred P. Sloan School of Management, Massachusetts Institute of Technology, Telephone: (617) 253-7166; Telex: 921473 MIT CAM.

The Rue de Paradis, World Renowned The 30 shops of the Rue de Paradis offer you the greatest names and the most

prestigious collections in tableware. China, Crystal Glass, Gold and Silverware, Gifts.

Credit cards accepted. Shipment worldwide.

Describing McLaughlin, the re-curring adjectives "confident," "decisive" and "positive" reflect maturity for his age." where some guys just get together to cut a record hoping to make a lot of money. You know, 'Let's get Jack DeJohnette, Eddie Gomez and Miles Davis's saxophone play
where some guys just get together to commitment I want to play music that has organic personality.

"There's not all that much happening at this point. Good group wibes like the Mahavishnu are supersonality. his own perspective: "I'd rather play three notes that remind some-body of a lake in Montana than play a bunch and have somebody say, 'He's burning!' " McLaughlin (who lives in Monaco and records in Paris) is one of the rare musicians who has learned how to use don't want to be part of that sort of taking off, like - now. I hope one electricity instead of being used by situation. A lot of young musicians of them will be mine."

committed fight fan: "We'd go coke. I said to him: I wonder publicist to promote it, rare corpodown to Gleason's Gym and mess whose drug is worse, yours or rate support of a jazz record.

Describing McLaughlin, the remaining for his age."

it. He says Evans is "the new guy to will play anything anywhere with watch in town. He has amazing anybody. We bring people together.

Bridges bring people together - over valleys, rivers and seas. Bridges forge links. Between neighbors and travelers. On foot, in trains, in cars. Linking economies and nations. With its extensive know-how and experience, Krupp translates the latest bridge-building concepts into reality. Via ultra-fast assembly techniques or by floating sections into position, saving both time and cost. To produce bridges of steel elegantly spanning large distances. Another pacesetting Krupp technology.

Engaged in structural and mechanical engineering, indus- Krupp. A tradition of progress.

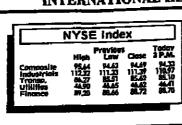

trial plant design and construction, electronics, steel, shipbuilding and international trade, Krupp offers innovative technology and engineering worldwide that can bridge the gap to future growth. Can we forge a link for you?

For further information please write to: Fried. Krupp GmbH, StA Vf/W, Altendorfer Straße 103, D-4300 Essen 1.

At 3 P.M.: NYSE Trading Slow NEW YORK - Prices on the New York Stock Exchange were slumping late Monday afternoon in lackluster trading amid investor uncertainties about the course of interest rates and the U.S. economy.

The Dow Jones industrial average, which skidded 11.48 Friday, was down 7.40 to 1.199.97 an hour before the close. The average lost 17 courts last week

lost 17 points last week.

Declining stocks led advancing ones by a ratio of 9 to 5. Volume was about 56.4 million shares, down from the 71.1 million in the corresponding period Friday.

Prices were lower in moderate trading of

American Stock Exchange issues. While prices in tables on these pages are from the 4 P.M. close in New York, for reasons of time this

news account is based on information gathered

Analysts said the stock market was restrained from the outset by a large selling program that was initiated early Friday and jolted investors who had been in an optimistic mood. Some traders were encouraged that federal

funds rates that banks charge one another over-night dropped to 11% percent from 11 9/16 percent Friday. These rates have been edging downward the past week.

That was one reason the bond market, which had skidded at the outset, began to improved Monday afternoon. The bond rally "could cut the stock market's losses," said Harry Laubscher of Paine Webber. "The volume is light and that is a strong sign this is just a consolidation period."

990 1,797 2,192 1,221 2,284

Sples 377,897 384,751 401,231 380,134 221,299

Marvin Katz of Sanford C. Bernstein & Co. said the "bond market could lead the way for a move in equities. I think the market has been faltering because of a lack of cash on the part of institutions. But I think things could improve by the latter part of this week."

But Wall Street was watching closely the labor negotiations with U.S. automakers this week. Friday midnight is the deadline the Unit-ed Auto Workers union has set to go on strike against General Motors if a new pact is not

Several analysts said they believe a strike would slow the U.S. economy from its heated pace of the past several months, ease borrowing pressures and eventually result in lower interest rates if it is protracted.

Pacific Gas & Electric was one of the most active NYSE-listed issues following a series of large block traded. Northeast Utilities also made the list with a large block. Revlon (ex-dividend), which spurted 2 points last week on a flurry of takeover rumors, was

IBM was in the spotlight in heavy trading IBM introduced improved graphics and other features for its personal computer line. AT&T

Among the other high-technology issues, Teledyne was sharply higher at the outset. Advanced Micro Devices, Honeywell, Burroughs and Control Data (ex-dividend) were lower at

# Decline in Commodity Prices Linked to High Interest Rates

By Randell E. Moore

WASHINGTON -The precipitous decline in commodity prices has been the economic enigma of the year, according to many econo-

Although economic growth in Western industrialized countries probably peaked this summer. prices of raw materials tumbled, contrary to their usual behavior. Normally, failing prices benefit consumers as the declines are translated into lower inflation. But broad-based price declines - what économists call deflation — can also signal a sharp economic contraction.

Opinion in the economic community is sharply divided on the mates, copper prices, adjusted for causes, consequences and longevity of this summer's price weakness. The actual declines are not in dis-

Since peaking in mid-May, the coa, coffee sugar cotton and, to a events of this summer, however, even as inflation through much of

Commodity Research Bureau Inc.'s broad index of spot commodity prices has fallen 23 percent. The Dow Jones Index of Commodity Futures has fallen from 153.11 to 129.45 since last August. And, sensitive-materials prices in the U.S. Commerce Department's Index of Leading Economic Indicators dropped for the 16th consecutive

month in August. Declines in individual commodities have been even more dramatic. off. Among industrial materials, himber has been particularly hard hit, tumbling by half its value since aluminum and tin also have plum-

in more than a century.

Perhaps the most widely noted

price declines were those of precious metals. In fact, gold seems to have led the overall nosedive in commodity prices. On July 9, the metal hit a two-year low of \$332 an ounce, completing a tumble of more than \$40 in just three days. In excesses of the 1970s, central banktandem, or soon thereafter, other ers have in large part pursued strincommodity prices joined in the sell-

Economists were caught off tary authorities reduced moneyguard by the declines, according to supply growth and available credit Charles Lee, an economist with in an effort to break the back of the beginning of summer. Prices of Northern Trust Co. "Prices had inflationary expectations. So strin-industrial metals, such as copper, been soft, but the declines in July gent, in fact, were these policies, surprised more people than they meted. According to some esti- would likely admit," Mr. Lee said. At this stage in past business 1930s during 1981-1982. Nonethe-

# **Financial Futures** Take First Step **In World Trading**

By Nancy L. Ross

WASHINGTON - The inauguration last week of futures trading in Eurodollars and Deutsche marks on the Chicago Mercantile Ex-change and the Singapore International Monetary Exchange marks a and institutional investors have milestone in the internationalization of financial futures, another step in the development of worldwide, round-the-clock markets. First day trading exceeded expectations, a Merc official said. Combined volume in Eurodollars and marks (plus gold futures traded on Simex) amounted to 49,000 contracts. Singapore traded 2,813 con-tracts, of which 663 came from Chi-

cago overnight.

For the first time customers can buy and sell contracts interchangeably on the exchanges in both countries, because of computerized clearing known as a mutual offset system. The necessity for taking duplicate positions is eliminated along with duplicate commissions and margins. Moreover, operations in different time zones double the available trading time for customers seeking to benefit from events occurring after exchange hours. They can trade by day on U.S. floors and by night on a foreign exchange half a world away as orders are electronically routed to market makers there.

Financial futures were created to protect traders against shifts in market prices. Yet, they also serve speculators by offering considerable opportunity for profit — as well as considerable risk. The market is composed of two basic types tion and rising interest rates in the of instruments: futures and options, and a hybrid options on futures. A futures contract obligates British pound. French franc and the buyer to buy or sell a commod-Italian lira and to a decade-old high ity at a specified price at a fixed against the Deutsche mark. Most date. An options contract gives the world commodities are priced in investor the right to buy or sell the Futures World, an international dollars. Consequently, nations like commodity at a given price on a trade publication. Most of the new it unprofitable to hold commod-ities unless prices are rising. This more for oil at a time when the customer to buy or sell a futures CONTRACT

Following more than a century of trading in agricultural commodity futures, the first financial future, a currency contract, was trad-Randell E. Moore is senior money ed in 1972 in the United States. Interest rate futures followed in 1975. The volume of financial fu-

tures remained minuscule until the late 1970s when interest rate volatility spurred activity. Now, as the result of continued high interest rates, currency and stock market fluctuations as well as the ease of telecommunications, individual made futures and options one of the fastest growing segments of the

The financial community and U.S. regulators plan to monitor CME/Simex operations closely to see if sufficient liquidity develops and if manipulation and other abuses occur. "Just wait until the first bankruptcy", warned a futures industry executive, referring to possible dangers in an arrangement where neither country has jurisdiction over trading in the other. Another potential impediment is disclosure. The Commodity Futures Trading Commission, for example, requires the identity of large traders but British law forbids it.

International difficulties notwithstanding, the Chicago Merc, which forged the bond with Singapore, is also negotiating with the London International Financial Futures Exchange. Another such linkage is contemplated between the Commodity Exchange of New York and the Sydney Futures Exchange. The Chicago Board Options Exchange is exploring a trading relationship with the European Options Exchange in Amsterdam as well as exchanges in London and Zurich. The Chicago Board of Trade is negotiating with the London Stock Exchange for permission to trade the Financial Times Stock Exchange 100 index.

There are more than 90 international commodity markets worldwide with more being established every day in places such as Bermuda and Rio de Janeiro, according to nancial futures, which do not require physical delivery. The bulk of the world's trading occurs on the dozen futures and five options exchanges in the United States, although 30 to 40 percent of all activity in the futures markets comes from abroad, the magazine said.

# FUTURES TRADERS & MARKET ANALYSTS. THIS IS... THE MOST IMPORTANT DISCOVERY EVER MADE ABOUT THE MARKETS.

THERE IS PERFECT ORDER BEHIND THE MARKETS... It makes no difference whether the markets are stocks, commodities, or any other freely traded markets. This perfect order is the basis of all

GEORGE MARECHAL DISCOVERED THIS FIFTY YEARS AGO... In 1933 Marechal drew a projection of what the stock market would do for the next fifteen years. (See below) George Marechal lived to be almost ninety years old but when he died, his secret died with him. One man working alone in Chicago in the summer of 1983 rediscovered what I believe was Marechal's

THIS SECRET HAS JUST BEEN REDISCOVERED ... It is now available to members of the DELTA SOCIETY INTERNATIONAL (DSI). Applications for membership are currently being accepted.

IT'S HARD TO BELIEVE, BUT THUE

Pick a year . . . then pick a commodity . . . for example T-BILLS 1988. I can chart every intermediate turning point and every major turning point that T-BILLS will make in 1988. Or better yet, pick a date . . . any date . . . say March 22, 1992. I can punch that date into my Apple or IBM computer and immediately obtain a hard-copy print-out of the previous intermediate turning point, the next in-termediate turning point and the following intermediate turning point. . . for every commodity...or for any portfolio I choose.

Replacing that disk with the long term disk, again, I can punch in any date and obtain a hard-copy print-out of the previous long term turning point, and the next two long term turning points for all commodities or any predetermined portfolio of commodities,

### THE MOST SIGNIFICANT DISCOVERY

There have probably been a thousand books written about forecasting what markets will do in the future. They all pale into insignificance when compared to the discovery of the cause of market movement. Supply and demand determine the extent of marks movement...that is, how far up or down the swings will go. However, the timing of these swings...the turning points.. both long term and intermediate term are caused by something that, once it is understood, makes all future market swings predictable with a very high degree of accuracy.

For example, the average accuracy (based on over 200 years of daily observation) for all 25 commodities for the following intermediate term turning points is as follows:

his innovative and original contributions to technical trading. His revolutionary book. New Concepts in Technical Trading Systems is legendary in technical trading circles. FORBES MAGAZINE (Oct. 80) singled Mr. Wilder out as "The premier technical trader publishing his work today " Wilder's "Relative Stren Wilder's "Relative Strength Index" (RSI) is plotted by most chart services

Welles Wilder is known world-wide for

for each commodity. His "Directional Movement" system and "Parabolic Time/Price" system have become bywords to technical traders world-wide Most computer trading systems in use today utilize some of Wilder's originally published concepts. Mr. Wilder has presented his methods and systems all technical trading seminars in Asia, Australia, Canada, the U.S. and the capitals of Europe.

# A Gambling Arena, but Don't Count on Luck

By Roger Collis

ANTIBES, France -- If you are tempted to speculate in commodity futures, think again. You are likely to have as much luck — and much more fun - trying to break the bank at Monte Carlo. Unless you really know what you are doing. You can lose your shirt playing chemin de fer, but in commodities trading you can risk losing the shirt you do not even

According to Paul Straatsma, manager of New York stockbrokers Thomson & McKinnon's Monaco office, 95 percent of the people who speculate in commodities lose money. Even successful traders may make most of their profits on 5 percent of their trades.

There are two broad classes of people dealing in commodities: speculators and hedgers. Hedgers are producers and consumers of commodities, banks and institutions, who want to protect a given price or position in a commodity. Hedging represents 50 to 60 percent of the total market. It is the speculators who take the major risk and provide the liquidity for the hedgers to operate.

Most traders never receive or deliver the commodities, instead speculating on the rising and falling values of contracts for future delivery. For every trade there is a buyer and a seller. A buyer is somehody who thinks the market will go up; a seller is somebody who is a zero sum game.

Speculators normally trade on margin, What this means is that they pay a deposit to their broker of 5 to 10 percent of the initial value of the contract. When the market moves it multiplies their profit or loss 10 or 20

Imagine that you are trading a contract of gold at \$44,000 with a margin of only \$2,500. If the price of gold moves \$25 you have either doubled your money or lost it. In the latter case you will get a margin call from your broker to cover your lost deposit. Normally you can limit your loss to the amount of your margin by putting in a stop. A stop is an order to your broker to get you out when the market hits your price or bounces through

Punters will tell you to take your losses out quickly and let your profits ride. Advice that sometimes hard to follow.

André Ollbrich, a vice president and commodities specialist at Thomson & McKinnon. says: "If gold drops \$100 overnight in Hong Kong as a result of some political news, and you are in New York with your contract of gold, the market in New York the next day is going to open \$100 down. If your stop is in the middle there is nothing you can do. You thanks the market will go down. For every are stock. A good broker can usually get you

trade somebody gains and somebody loses. It out. But you could be locked in a position and wiped out." "It's the most anti-human character kind

of game you can imagine," says Paul-André Jacot, manager of Conti Commodity Services in Geneva. "First, because in commodity trading the big money is made on the down-side, selling short, which means selling something you don't have in the hope that you can buy it back at a cheaper price. Second, the only way you will probably make money is to accept the fact that you are wrong. Most people say, I am right, the market is wrong." Speculators can be categorized according

to six basic types of trading style. They are: • The gambler -- a seat-of-the-pants operator with more money than sense. He has no strategy. He picks up bits and pieces of information and buys and sells without knowing what he is doing. For example, he has a friend who has just bought 50 contracts of gold. He wants to be one up on his friend so he buys 100 contracts. If gold happens to go up he does not know at what point to get out. The gambler will lose money consistently. After a while he will either be broke and quit trading

or he will get smart and develop a system.

• The wiseacre — a gambler with a system. He has started over to try to win back the money he has lost. But he is going to make the same mistakes as the gambler because he is so

(Continued on Page 11)

The top line of price fluctuetions is an actual reproduction of a copyrighted fifteen year market forecast as calculated and drawn in 1933 by George Marechal.

The bottom line of price fluctuations is the actual Dow-Jones Industrial average from 1934 to 1948 - the same fifteen years as projected by Marechal.

[1] 51% of the time the projected turning point will occur within 2 days of the

date projected. [2] 68% of the time the projected turning point will occur within 3 days of the

date projected. [3] 81% of the time the projected turning point will occur within 4 days of the date projected.

The long term accuracy is comparable. I believe that the only other person who ever discovered this phenomenon was George Marechal. It would explain how he could have determined the market turning points used in his famous chart shown above.

# **CME-SIMEX Trading Link**

# Making financial history

The Chicago Mercantile Exchange and the Singapore International Monetary Exchange (SIMEX) are about to make financial history. Soon, futures contracts in Eurodollars, Japanese yen and German marks traded on the SIMEX will be substitutable with those offered on the CME\* For the first time, traders will be able to open a futures position on one exchange and offset it on another.

The link will expand the trading day in these contracts to 12 hours, giving traders flexibility to react to the fast-breaking events that affect international markets. It's a major step towards 24-hour exchange trading—the ultimate in futures flexibility.

For more information about this historic link, contact your broker or call the CME. In the United States, call 800/ THE-MERC. From overseas, or in Illinois, 312/930-1000. ■

# **World Prices and Rising Interest Rates**

The slower pace of economic rowth in Europe vis-à-vis that in the United States, also contributed to reduce demand and subsequent price weakness. Whereas real U.S. economic growth during the first half of 1984 ran at a robust annual rate of 8.8 percent, the average rate of expansion in West Germany, Britain, Italy and France was only

The final culprit cited by most analysts as contributing to the phinge in prices is an abundance of supplies. While specific situations vary from commodity to commodity, many producers find themselves facing reduced demand and falling prices that they attempted to compensate for by increasing production, thereby exacerbating heir dilemma, according to Eve-Tainer, an economist with First National Bank of Chicago.

ward pressure on U.S. domestic an effort to boost revenues needed agricultural commodities. Govern-

largest oil exporting nation, cut prices in August to offset slack demand And, Saudi Arabia, the inchpin of OPEC, inexplicably time threatening the very survivability of OPEC.

Although major oil exporting na-tions and the multinational oil firms have recently succeeded in shoring up prices for crude, the oil market remains vulnerable to a rapid slowing in economic growth in the industrial world that some analysts say is now occurring.

In contrast to oil, agricultural prices have almost exclusively been the victim of huge supplies. America's midlands are overflowing with wheat and feedgrains this year. Beneficial weather and government subsidy programs almost certainly insure that U.S. farmers will produce record or near-record corn and soybean crops. Cashed-starved In the case of the Organization Brazil and Argentina also proof Petroleum Exporting Countries, duced record soybean harvests. AlIran and Iraq engaged in price discounting to compensate buyers for due to poor weather has lent some tors faced with economic and politsion.

prices has resulted from a flood of imports made cheap by the dollar's strength.

an error to noost revenues needed agricultural properties have been initiated during the last few years in an effort to reduce food imports and foreign-exchange

> Industrial metal prices have sufboosted production in July, for a fered for both supply and demand reasons. To begin with, prices for many never fully recovered from the reduction in demand associated with the worldwide depression of 1981-82. Research and development of stronger plastic, dropping the price of an ingot from 70 cents in January to slightly more than 49 cents near the end of August. Innovation in the recycling of aluminum cans has also reduced the demand and price of bauxite, the ore from

which aluminum is processed. The post-industrialization of America and other Western na-tions also has reduced demand as and serviced-based sectors grow.

(Continued From Page 9)

the increased risks and insurance dollar has forced the U.S. exporters to reduce prices in an effort to remain competitive abroad. Down-remain competitive abroad. war in the Middle East sent gold prices soaring, today the haven of choice is the dollar or dollar-denominated government securities.

Perhaps the most intriguing question surrounding the precipitous weakening of raw materials prices is what it portends for the future. Though hailed by some as catharsis, ensuring a decade of the during the late 1950s and early 1960s, others are less sanguine.
The consensus view seems to

hold that the world is experience disinflation, where some prices fall but others rise or remain stable Though disinflation represents lowering of inflation and inflation ary expectations that is likely to reduce the rate of inflation the rest of this year and early next year, beyond that most prices would probably resume normal increa Though some now forecast that the inflationary spiral has been broken resents a minority view. More one The root cause of declines in gold and silver have special significance. For hundreds, if not thousands of years, precious metals were the financial refuge of investors feed with economic and political results.

# Investment in Managed Accounts Grows

By Morton S. Baratz

WASHINGTON - No one has accurate data about the total nount of money invested in managed futures accounts in the United States and the European Community. But Managed Account Reports, a U.S. publication, estimates that \$1.5 billion is currently being managed by futures trading advisers in the United States and another \$200 million by trading advisers in the United Kingdom and West-ern Europe. Included in the former total is an unknown but steadily growing sum owned by Europeans and entrusted to American futures

The numbers just mentioned, alvast sums invested in managed eq-uities accounts, mutual funds and pension trusts. In the United States alone the aggregate for that kind of ent runs into many hundreds of billions of dollars. What makes the figures for managed futures accounts seem so striking is pected return than portfolios of their current size compared with stocks and bonds alone." their current size compared with stocks and bonds alone."

There are several reasons for this the likelihood they will make money in no better than one in four, and many seasoned observers think the odds are less favorable than that. The prospects for profit for the owner of a managed account that is owner of a managed account that is

traded by a seasoned, proficient answer as one might think, because ly high volume of transactions, On money manager are substantially "best" means different things to the average, though, commissing money manager are substantially

Just how much is far from clear, but small-scale studies done by this writer indicate that the probability profit may be much higher if market conditions are consistently hospitable to money managers trading systems.

A second consideration, related to but separable from the first, is widening recognition among inves-tors as a breed that if some portion -say, 5 percent to 15 percent -of an investment portfolio is allocated to a managed futures account, the performance of the total portfolio can be enhanced considerably. In the more measured words of the though large by some standards, late Professor John Lintner of the are paltry in comparison with the Harvard Business School: "The combined portfolios of stocks [or stocks and bonds] after including judicious investments in appropriately selected sub-portfolios of in-vestments in managed futures ac-counts . . . show substantially less risk at every possible level of ex-

different investors. Furthermore, it is somewhat misleading to compare trading managers with one another because they differ considerably in trading objectives, trading strate-gies and trading tactics.

Investment units of most, but sold with a front-end load of 7 to 8 percent. The sales charge may be added to the unit value of the investment in arriving at actual purchase price of the unit, for example, \$1,000 plus \$70 equals \$1,070, or may be subtracted from nominal unit value, for example \$1,000 minus \$70 equals \$930. In a few cases, coups the selling charges by taking all or a portion of the fund's earnings from investment of equity in interest-bearing media. Managed accounts opened in the name of a single person, however, practically never carry a front-end load.

The largest single component of costs is brokerage commission. Although the cost of executing a trade stocks and bonds alone." on a U.S. exchange rarely exceeds
A third contributing cause of \$5, the charge to "retail" customers their current size companies with their size only five years ago. In the United States in 1979 the combined investment in managed functions in the latter's solid performance of the states of the country averages about \$85 per counts is the latter's solid performance of the states of the country averages about \$85 per counts is the latter's solid performance of the country of the country averages about \$85 per counts is the latter's solid performance of the country of thres accounts was barely one-sixth mance, in comparison with other futures mutual funds, \$60-\$70 (almost it is now. The same probably holds true for Britain and the noted, in particular, that during en to the \$30-\$50 range); and to rest of Western Europe. To put it 1978-1982 the annual rate of return owners of large (250,000 and up) succincily, managed futures ac- on futures mutual funds was three individual accounts and traders of times that on stocks and 28 times similarly sized private pools, as litthat on bonds, and that between the as \$15. In Europe, by contrast, June 1983 and June 1984, 13 of the "standard" commission rate growth, of which three seem especially important. First, more and more speculators who "do it them selves" have come to realize that the "standard" commission rate top 20 performers in the futuresfund group had higher rates of return than all of the 20 top-performturn than all of the 20 top-performcommission charges as a fraction of

charges constitute from 15 percent to 18 percent of average and

The large majority of fature trading managers demand an adcount; this fee is collected irresper amount to vary directly with the adviser's performance. Most managers also call for an incentive bemus, commonly computed at 15 percent per quarter on an increase in net asset value (after adjustment for deposits and withdrawals from the account) above a previous high

accounts, like general partners of futures mutual funds, increasingly succeed, however, in extracting gotiating discounts in both feat for example, 4 percent admi tive\_10 percent incentive) or climnating the administrative fee in return for increasing the incentive fer to, say, 20 percent or 25 percent, What one must expect in most instances, in any event, is that the between 20 percent and 30 pencest of average yearly equity. That means, in turn, that the trading to present investors with a net return that justifies the high risk the latter take. More than a few do so, not only in single years but over a period of years.

# Price Stabilization Talks Reach Impasse

By Brij Khindaria

GENEVA - Negotiations to conclude international agreements to stabilize commodity prices are at a standstill because of growing doubts about their ability to deliver

The United States has always been skeptical of proposals pro-moted by the United Nations Conference on Trade and Development (UNCTAD) for international commodity agreements (ICAs) aimed at keeping world prices of certain commodities within pre-agreed cice bands.

But similar skepticism was demonstrated in July by developing countries as well when they opted for a new international sugar agreement that did not contain provisions to stabilize prices.

The reasons for Third World

skepticism are different from those of the United States but both reflect growing lack of confidence in the utility of ICAs in reducing price The United States continues to

oppose price stabilization accords ecause it feels that governments should not join hands in interfering with free market forces in turn. Developing countries now recognize that current market conditions for such commodities as sugar have made price stabilization agreements unworkable.

For instance, so far this year world sugar markets have been unremunerative because prices have usually stayed below 6 cents a pound, whereas 13 cents a pound is generally considered to be the lowest price needed to cover costs. Stabilizing the price at such low levels is undesirable while raising them through an ICA is not feasible.

Both Western and Third World governments agree that poor nations exporting commodities are being scriously hurt by low prices. But consensus remains elusive on how to moderate the falling price

In its latest annual report pubcauses of low comodity prices is oversupply by producers. It implicitly admits that at this time creating

duce supplies is more important main on whether the credit should than agreement among producers go to ICAs or whether the modera-and consumers to stabilize prices tion would have happened anyway. through management of free mar-

kets.
UNCTAD continues to call for ICAs that would use a combination of export quotas and buffer stocks to stabilize prices. But running such accords can be very expensive. One estimate puts the cost of stocks for ICAs for cocoa, rubber, tin and sugar at more than \$3 billion.
This high cost is a reason that

UNCTAD's ambitious Integrated Program for Commodities (IPC) has not met with much succes since its inception in 1976.

The program requires conclusion of price stabilization agreements for 18 primary commodities, including cash crops, minerals and metals. A "common fund" of \$750 million is required to be created to help the managers of each ICA to raise the money needed to pay for buffer stock operations.

Although agreement was reached to create the fund in 1980, subsequent U.S. opposition to setting up new international financial institutions is likely to keep it from oming operational for some

Negotiations for ICAs have mostly failed. Only the ICAs for natural rubber and jute were completed after 1976. The four other current agreements — on cocoa, coffee, sugar and tin — existed before that date.

A new agreement on tropical timber is reported to be near completion and another on tea might also make it to the finishing line after some more rounds of negotia-

Among other negotiations at various stages of advancement are those for meat, vegetable oils and oilseeds, hard fibers, bananas and

None of the existing agreements has worked effectively to stabilize world prices. While the agreements on coffee, rubber and tin are creditlished on August 31, the UNCTAD ed with having helped to temporar-secretariat said one of the main ily moderate price falls, those for ily moderate price falls, those for sugar and cocoa have failed dismal-

In cases where falling price agreement among producers to re-trends were moderated, doubts re-

go to ICAs or whether the modera-tion would have happened anyway.

The reason for the doubts is the arge size of the price range allowed in the ICAs. For instance, the range varies from 90 percent for sugar, 80 percent for rubber and 60 percent for cocos to 30 percent for im. The new sugar agreement, which will come into effect on January 1 next year, will abandon efforts to stabi-lize prices. Instead, it will promote consultation among importers and exporters whenever prices enter a sharply falling trend.

convinced that "an effective international commodity strategy 5 urgently needed to safeguard the interests of producing countries against a price collapse arising from factors outside their control It has collected figures shown that Western exporters are hu when Third World export earning fall. For instance, between 1980 and 1982, the imports of Third World commodity producers ldi by \$15 billion although their export earnings declined by only \$13.8 kg

# **IBM Introduces** New Equipment

RYE BROOK, New York — International Business Machines Corp. introduced on Monday new graphics displays and programs for its personal computers, a new model in its midrange computer line and new models in the larger System 38 line.

IBM said the professional graphic display and graphics controller will enable personal computers to generate and display as many as 256 colors simultaneously from a selection of 4.096 colors.

The display is priced at \$1,295 and the controller is \$2,995.

The company also introduced a personal computer display and adapter offering high-definition text and graphics in 16 colors simultaneously from a selection of 64 colors. This display is priced as \$200 and the display in this display.

taneously from a selection of 64 colors. This display is priced at \$849 and the adapter card will sell for \$524.

IBM also unveiled a PC engineering-scientific series. The new programs and adapters can be used for engineering models, advanced scientific computations, and in the control of instruments. ments in laboratories and factories.

IBM also said it is bringing out a new Model 3 in its 4361 midrange computer line. The Model 3 will be priced below current models at

the year added to their already overflowing bins with a big harvest. percent," Mr. Daniel said. "That

**BOOK NOW** for the American Metal Market London Forum London Hilton Monday 8th October 1984

Held on the day before the Landon Metal Exchange Dinner when ground 2000 members of the metal trade converge on Landon, the Forum has cted leading international speakers to discuss "The changing pattern in the Non Ferrous metal trade.

Programmes and tickets which include cocktails and luncheon cost £140 (or US\$185) per person and are available from Fairchild Publications of New York, 8 Bouverie Street, London EC4 (Tel: 01-353 9123).

\$6.50 a bushel. Corn futures, \$3.30 proximately \$23 billion. a bushel at one point, went below

"That sets the stage for the 1985 U.S. program, which will be a strong debate on what do we do about income," Mr. Daniel said. "We're going to have a real hot debate over two philosophies."

The first he summarized as "Let's drop loan rates and target prices, sell what the market will bear and get out of this problem"; the second says that "there's no such thing as free competition in the world anymore, that 90 percent of all wheat is bought and sold by overnments. So we need to adjust our supplies and prop up our farmers with supports."

The debate is likely to be heated even though farmers do not command the numbers of votes they used to. In the 1930s, the years of Dust Bowl and John Steinbeck's "The Grapes of Wrath," one in four Americans lived on a farm. In 1984, about three in 100 fall in that

But the group's impact remains tural options.

# Worldwide Trading Linkages Alter Commodities Exchanges

By Philip McBride Johnson
NEW YORK — There are functiones markets scattered about the globe, the result of local needs for the most part. These exchanges operated for years — in some cases, generations — with relatively little regard for their counterparts in other countries. To be sure they watched each other's prices but, as a rule, each served its own geoa rule, each served its own geographical area with only moderate encroachment from foreign-based

All of that is changing. Two years ago, a networking relation-ship or "linkage" was established

rodollars and foreign currencies.
And, in a few months, a third linkage involving gold futures between

# A'Gentleman's Agreement' In Output Catches Swiss Bankers Short

By H.J. MAIDENBERG

New York Times Service

■ URICH — Few events in recent decades have so shaken the Swiss banking community as the phenomenal growth of the U.S. and British financial and stockindex futures and options markets.

One result of rising investor interest in these markets is that it is andermining an odd "gentleman's agreement" that has long misted between the Swiss banks and foreign brokerage houses

doing business in Switzerland.

Under this arrangement, foreign brokers were supposed to refrain from soliciting local accounts. In return, the Swiss banks let the foreign brokers execute most of their securities business on foreign financial and equities markets.

The system worked well un-fit recently. Now, the Swiss banks have found that many of their institutional and individual clients were moving their accounts to the foreign brokerage houses, mainly in the United States.

"When you have a monopoly, you become protective, not innovative."

Because more and more of our institutional and other clients are getting involved in these futures and options markets that we Swiss bankers have been ignoring," said Nicolas J. Baer, chairman of Bank Julius Baer, one of the major banking organizations in Zurich.

Mr. Baer continued: "We Swiss bankers have not been innovative for two main reasons. One, we have long had a monopoly on managing money for our clients here. When you have a monopoly, you become protective, not innovative. Secondly, Swiss bankers, like our counterparts in other countries, have always equated fatures and options with commodities, and commodities with speculation, which we considered the opposite of prudent investing. That is why there is no commodity exchange in Switzerland."

But today, he said, portfolio managers are often considered imprudent if they do not use financial and stock-index futures and options to hedge, or insure, their holdings. "And once the accounts move to the Drexel Burnhams, Merrill Lynches and other brokers," he added, "they don't come back to the banks." This is why the Zurich Stock Exchange is considering opening

Switzerland's first futures and options markets. "We estimate it will take three years to organize such markets, install the electronic equipment and, most important, acquire the level of expertise comparable to the talent in the Chicago futures and options exchanges," Mr. Baer said. "Actually, our biggest problem is finding space for futures and options."

HE building housing the Zurich Bourse, where trading has soared by 50 percent in the last two years, is owned by the municipality, which uses the only other available floor for political and other meetings. The local officials have indicated that they do not relish giving up the centrally located and traditional meeting hall.

"In any case, the Bourse intends to move into a new building by 1990," Mr. Baer said, "and meanwhile we expect that, under the rentleman's agreement, the United States brokers will maintain their traditional low profile."

A somewhat different view was offered by Niklaus Inderbitzent regional manager of Merrill Lynch Capital Markets, Zurich, id: "The gentleman's agreement is still holding. But the fact is that today's money managers and other investors require ertise in the new financial and index markets. If the banks they can provide it one day, fine. At the moment, the forelen brokers have this expertise."

As a result, Merrill Lynch alone has increased its list of local institutional clients to 60 from nine since 1982, Mr. Inderbitzen without soliciting business. Other have had similar gains, he added.

"Most of the Swiss futures and options business flows to the London markets," he said, "but we will have more of it to move

# Fall Seen By OPEC

### **Mideast Survey** Reports Decline

NICOSIA — Total crude oil production by the 13 members of e Organization of Petroleum Exorting Countries in August fell to 16.4 million barrels per day, 1.1 million below the quota ceiling of 17.5 million, a weekly oil journal

eported Monday.
The journal, the Middle East Economic Survey, said reliable data on OPEC production figures were not easily available. It said it arrived at its figures on the basis of

its own rough estimates.
The August figure of 16.4 million barrels per day compared with esti-mated OPEC production of 17.8 million barrels per day in August 1983, the journal said.

At the indicated level of 16.4 illion barrels per day in August. OPEC crude production was only slightly more than the projected 16.2 million barrels per day of OPEC crude required to meet expected non-communist world consumption in the third quarter of the year, the journal said.

With the market thus more or less restored to balance and the expected fourth-quarter seasonal increase in demand now approaching, it is difficult to see last week's market weakness ... as anything more than a temporary phenomenon," the journal said.

"Some observers feel that buyers are simply hanging back for the time being to see whether financial pressures due to lower exports (in Iran and Nigeria) will oblige producers to give bigger discounts. But provided the producers keep calm, the problem should be short-lived," the journal said.

The Middle East Economic Survey said that last month's biggest drop in output was in Iran, where production fell to 1.7 million barrels per day from July's estimated output of 24 million barrels daily, Reuters reported. Output was also lower in Saudi Arabia, Libya, Nigeria, Indonesia and the United Arab Emirates, the journal said.]

### **■** Gasoline Prices Rise

An industry analyst said that sta-bilization of world oil prices prompted a quarter-cent increase in the average price of gasoline in the United States in the past two weeks. United Press Internationa reported from Los Angeles.

Dan Lundberg's biweekly survey of dealerships in the 50 states showed Sunday that the average overall price of gasoline at the pumps was \$1.182 per gallon, up 0.27 of a cent since the last survey. Regular leaded gasoline at self-

serve pumps averaged \$1.063 a gallon, up 0.36 of a cent. Regular un-leaded was \$1.141, up 0.34, and premium unleaded was \$1.273, up 0.2 of a cent.

At full service pumps, regular leaded was \$1.278, up 0.04, regular unleaded was \$1.344, up 0.19, and premium unleaded was \$1.424,

Prices started falling in May and continued to decline for 14 consecutive weeks through the heavy sum-

"But in the past four weeks, the prices have started to go up again Brita because of the decision by OPEC to pan. curtail production and its decision to stop the big discounts on the spot market," be said.

# Japan's Big Microprocessor Push

### Firms Expand Their Work on Semiconductors

By Andrew Pollack New York Times Service TOKYO - When NEC Corp. introduced a new family of microprocessors last spring, it marked a watershed for the Japanese semiconductor industry.

Japanese companies have already achieved well-publicized success in the market for memory chips, or circuits that store data in computers. U.S. manufacturers were alarmed when the Japanese captured the world market for two popular memory chips, known as the 64K and the 256K dynamic RAMs, or random access memories.

But now the Japanese are trying to move beyond RAMs into more complex chips requiring more design innovation. NEC's move into these microprocessors, the chips that serve as the brains of personal computers, is the boldest step in this direction, and one that is far from certain to

"Generally, Japanese companies' products have been oriented toward memories and other easy products," said Tomihiro Matsumura, senior vice presi-

deat and director of NEC.
"We have to increase our position in the business field," he said. "To do that, we need pro-prietary products."

While Japan's move beyond RAMs faces many challenges, Japanese producers are making steady progress in expanding the scope of their activity in the semiconductor field. Japanese companies account

ed for 36.8 percent of worldwide shipments of semiconductors of \$18.7 billion in 1983, up from 34.2 percent of shipments of \$14.9 billion in 1982, according to Dataquest, a California market-research firm. And Japanese companies have

now surpassed U.S. companies in the amount that they are investing in new plant and equipment, as they continue to expand aggressively.

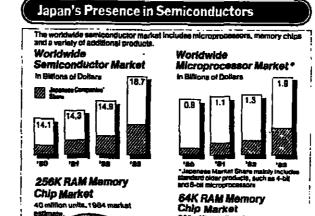

Already Japan has produced some giants. NEC is now the

third-largest semiconductor maker in the world, behind Texas Instruments Inc. and Motor-

nternational Herald Tribune

PARIS - Yvon Gattaz, presi-

ola Inc., while Hitachi Ltd. and Toshiba Corp. are fourth and fifth, respectively. Much of the Japanese gains have been in memory chips. Hitachi was the

largest memory-chip producer in 1983, rising from sixth in 1980. Dynamic RAMs were the initial focus of Japan's efforts in the market because they are the largest volume part used and are tairly easy to design. Also, because they are standard parts, sophisticated marketing is not needed. The trick is in making them, a task at which the Japa-

nese excel. Japanese companies, particu-larly Hitachi and Toshiba, have also captured the dominant share in the market for a slightly different part, the static RAM. And several companies are making inroads in the market for erasable programmable read-only memory chips, or Eproms.

Japanese companies, led by Fujitsu Ltd., are also becoming strong in the production of semi-customized chips known as gatearrays. These chips are mass produced until the final few customized for each user.

Many analysts had expected that the trend toward more customized parts would hurt Japanese suppliers in the U.S. market because the customer and the chip makers must work closely together and distance could present a problem.

But so far, the Japanese have managed to surmount any obstacles by linking up with U.S. companies and by opening U.S. design centers. Dataquest estimates that Japanese worldwide gate-array revenues will grow more than 80 percent in 1984, and even more in the U.S. market. Typically, the Japanese em-

phasis is on production, not product design.

Many Japanese companies, for example, have taken steps to automate production and thus eliminate people, who bring in dust. A particle of dust can render the circuit useless. Such impurities become a greater problem as more circuit elements are crammed onto a chip, a process known as Very Large Scale Integration, or VLSI.

In addition, Japanese compa-nies are world leaders in a process for making chips that consume little electric power, a legacy from their experience in designing battery-operated consumer electronic devices.

And they are now putting emphasis on making faster circuits, for help in making high-speed (Continued on Page 17, Col. 4)

# U.S. Steel Plans Huge **Asset Sales**

NEW YORK -- U.S. Steel Corp. expects to sell assets valued at about \$1.5 billion between 1984 and the end of 1986, the chairman, David Roderick, rk at

1 Au

aom-

. and

could

,lecrec Fanud

TUŊ

ı legal

said Monday. He told securities analysts that there will be "no sacred cows" in the company's asset

redeployment program.
U.S. Steel has sold assets totaling about \$300 million so far this year and expects additional sales of \$340 million by the end of the year. Asset sales in 1983 generated about \$500 million in

Mr. Roderick said U.S. Steel has reduced its debt by \$600 million so far this year and expects to cut it by at least a further \$2 billion by 1986.

"The earnings outlook is brighter," Mr. Roderick said, adding that the company has unused net operating losse investment tax credits that could be used to shelter about \$2 billion of future income. He said U.S. Steel is "determined to weed out nonprofita-

ble lines in favor of moneymakers.' U.S. Steel took a 1983 fourth quarter after-tax charge of \$650

million in connection with the shutdown of a dozen steel-making facilities.
When facilities are obsolete. we must face the facts squarely and proceed accordingly," Mr.

Roderick said. He estimated

that plants closed in recent vears would have produced annual losses of \$300 million had they remained in operation. Mr. Roderick said the American steel industry needs a comprehensive solution to the probicm of "unfairly traded" steel imports to the U.S. market.

He said such a remedy is required "before anything resembling a profitable production load can be predicted for U.S. Steel or any other American steelmaker.'

# **IBM Introduces** New Equipment

United Press Internation

RYE BROOK, New York — International Business Machines Corp. introduced on Monday new graphics displays and programs for its personal computers, a new model in its midrange computer line and new models in the larger System 38 line.

IBM said the professional graphic display and graphics controller will enable personal computers to generate and display as many as 256 colors simultaneously from a selection of 4,096 colors.

The display is priced at \$1,295 and the con-

troller is \$2,995.

The company also introduced a personal computer display and adapter offering high-definition text and graphics in 16 colors simultaneously from a selection of 64 colors. This display is priced at \$849 and the adapter card will sell for \$524. IBM also unveiled a PC engineering-scientif-

ic series. The new programs and adapters can be used for engineering models, advanced scientific computations, and in the control of instrunents in laboratories and factories.

IBM also said it is bringing out a new Model 3 in its 4361 midrange computer line. The Model 3 will be priced below current models at

# Sports Car Body Contract for GM Helps Pininfarina to Bounce Back

By John Tagliabue New York Times Service TURIN - Pininfarina, the Itallan mito design company, sails under two flags these days. On the inst outside this Piedmontese smokestack city, the America's stars and stripes flutter alongside Buly's ned, white and green.

But for Pininfarina, which is to cars what Gucci is to shoes, the display is an economic rather than a pointeal statement.

One year ago, the company signed a five-year, \$600-million contract with General Motors, the farfiest U.S. automaker, to deliver (8,000 custom-designed auto bodics to GM's Cadillac division. And the agreement seems to have beloed it hounce back from adversity. Past three years ago, Pininfarina was shaken by the recession. The

### **Bell Group Says** Profit Up 126%

PERTH. Australia - Bell Group Ltd. reported Monday that net earnings rose 126 per-cent to 40.54 million Australian dollars (\$33.68 million) in the year ended June 30 from 17.86 million the year before.

The rise in the multinational transport and communications group's profit came from across the full cauge of its activities, the chairman. Robert Holmes à Court, said. The world economic recovery and greater efficiency in the group's operations particularly in newly acquired companies, contributed to the

carnings rise, he said.
- Associated Communications Corp. PLC has become more efficient, after restructuring, in the period Bell has controlled it, he said. He added that Bell has been disposing of those assets it is not prepared to invest more in, and using the funds to invest in those it is keeping.

tomer, fell victim to the austerity Italy's largest automaker imposed to get its own house in order.

Today, though a final verdict is pending, all that appears to be radically altered for the better, thanks in part to the GM agreement.

Last year, Pininfarina emerged from losses with a \$1.1-million profit, and started a two-year, \$15million modernization program to tool up for GM production.

Under the GM arrangement, Pininfarina will design and build a convertible body for a Cadillac sports car, to be called the Callisto. GM hopes the new car will garner a share of the lucrative sports car market in the United States.

"The General Motors accord was extremely important," Sergio Pininfarina, the son of the company's founder and its present chairan, said recently. "First, psychologically: For the first time the world's biggest automaker grasped that it paid to engage a company

"Secondly, the economic side: It permits Pininfarina to enlarge itself and to modernize, in a qualitative

more than a quantitative sense."

For some, Pininfarina's contract with GM, following a similar ac-cord between Chrysler and Maserati, the sports car maker, was chiefly a victory for Italy's design industry, which by some estimates earns the Italian economy as much as \$10 billion yearly in export reve-

But more important, some analysts feel, the company's recovery GM's decision also reflects a sh from bitter labor problems and de in American investor attitudes. clining profitability is emblematic way many of the samilyowned companies that form Italy's last year to acquire a 20-percent economic backbone are prospering stake in Olivetti, Italy's profitable by seeking out market niches and office machine group, Mr. Pininby seeking out market niches and office machine group, Mr. Pinin-supplying specialized services to farina said: "From 1970 to 1981 corporate customers that could not there was a trend to disinvestment. perform them as cheaply them-

in 1981 to begin producing small disinvest then."

company's factory outside Turin batches of custom-built cars for was shut by strikes, and a major large automakers who wanted to contract with Fiat, its largest cussell a prestigious sports car, but whose high-volume assembly lines were unable to produce them profitably.

Today, Pininiarina's single assembly line, where workers still use hand took to smooth welds and polish coats of enamel, turns out about 120 cars and bodies daily for customers like Ferrari, Fiat and

That number will rise to about 300, according to Andrea Pininfar-ina, Sergio's 27-year-old son and project manager for the GM accord, when a new robotized assembly line and total immersion paint

shop go on stream next year.
"You have new materials, and new expectations, like 10-year war-ranties against corrosion," he said.

About 1,400 of the company's 2,400 employees are now involved in producing bodies and cars. But though the industrial division, as it is called, generates \$72 million of revenue yearly, the company reallike ours in a specialized project. If izes that design, with revenues of the accord succeeds, it opens now about \$5.5 million, remains the paths for Pininfarina.

that it is the company's creativity, quality and exclusivity that attract quality and exclusivity that attract corporate customers like General payroll from 58,000 to 36,000, reMotors. "The company will remain small," he said. "We do not want to (then nearly \$1 billion) and

Still, for an industrialist like Mr. Pininfarina, who was elected to the European Parliament in 1979 to 31. represent the business-oriented Liberal Party, and who heads the Piedmontese Industry Association, GM's decision also reflects a shift

He reflected a moment, then The critical move in the compa- added: "They do well to invest here ny's development was the decision now - just as they did well to

# BA Takes Case to Public Over Routes

The Associated Press LONDON - British Airways

PLC went to the public Monday in its dispute with the government over plans to hand 30 of its major profitable routes to private opera-

The state-owned airline bought proposed handovers would do nothing to stimulate a better service since there's no extra competi- drink called Pacific.

The chairman of the state-owned airline, Lord King, also told a radio reporter Monday that he and fel-low directors will not obey orders to give up any routes. Deliance could mean the firing of the entire The cabinet is to decide on the

proposal, which was made by the Civil Aviation Authority, at its regular Thursday meeting.

Lord King has threatened before to resign if the government accept-

ed the proposals.

Lord King, an industrialist and bout \$5.5 million, remains the founder of engineering companies, said Monday that he had accepted leadership of BA in 1981 after be-

years old this month, acknowledges ing promised the airline's routes would be safeguarded.

achieved an operating profit of £250 million (then \$365 million) in the fiscal year that ended March

BA to private enterprise next year. The aviation authority is recommending that BA's operations from London's airport at Gatwick, and European flights from regional airports in the rest of Britain, should be transferred to independent op-

Heinz Reports Rise in Net The Associated Press

PITTSBURGH - H.J. Heinz Co. said Monday that despite the strong dollar's adverse effect on

# Alcohol-Free Movement Is Big Business in France vision campaign against drinking the company made its reputation

a cider aimed at the cola consumer, and it is part of a change in drink- French table wine and wine-based ing habits that is causing far-reach- aperitifs. ing changes in the French beverage

industry.

Leading the new wave is the saus alcool movement, a shift by people American soft drinks, iced teas, mineral waters, even an anis-based

The same phenomenon has been observed elsewhere in Europe and, with particular force, in the United States, But in France, where a meal without wine has historically been viewed as uncivilized, it carries additional cultural overtones.

"We don't drink every day the way we used to because our way of life is completely different," said Henry de Montremy, who follows the beverage industry for Tuffier Ravier, one of Paris's biggest stock-brokers, and who himself owns a

instead of drinking a bottle of table wine each day at lunch between two, or three people, they'll more often opt for a more expensive botwine two or three times a

has cut sharply into demand for beginning to reap big rewards.

According to the French soft drink union, Syndicat National des Boissons Rafraichissants, consumption of colas, tonics, bitters concerned with health and diet and fruit juices has rocketed, with double-page spreads in the nationaway from alcoholic beverages to cola consumption alone growing al press Monday to argue that the such things as alcohol-free beers, from 165 million liters (about 43 million gallous) in 1978 to 226 million liters last year. During the same time. French table wine consumption dropped 20 percent and

beer sales remained flat. One inconsistency stands out: At the same time that demand is fall-

According to Denis Berthu, comcard. France's leading beverage producer and distributor of Cutty Sark and Wild Turkey, France is also the only country in Europe said, adding that nonalcoholic bevwhere whisky sales are increasing "The mode is toward the long drink," said Gerard Lamy, a Parisbased beverage analyst with Union

alcohol with fruit juices.

Last year, for example, sales for Pernod Ricard's alcoholic beverages in France slipped below 50 percent of annual sales for the first time. Demand for traditional aperitifs, like pastis and Dubonnet, and for such after-dinner drinks as cognacs and calvados was off as much as 16 percent, with sales down from \$545.8 million, to \$515 million.

By contrast, the company's nonalcoholic beverages and products division registered a 16.7-percent rise in French-based sales for products such as Coca-Cola and Oraning for table wine and aperitifs, the gina, an orange-based soft drink. appeal of the mixed drink has in-creased sales for grain spirits like gin and vodka. Despite falling demand for alco-holic beverages, Pernod Ricard fin-ished 1983 with earnings of \$58.8 million, 27 percent up from \$46.3 munications director of Pernod Ri-million a year earlier, on sales of

"That increase was due to our nonalcoholic division," Mr. Berthu erages will account for 40 percent of sales this year. Mr. Berthu said Pernod Ricard had invested \$3.75 million in Brut de Pomme, the most des Assurances de Paris, referring it has ever invested in a single prodto the American practice of mixing

cantly larger on the 512K.

PARIS — One of the newcomers too much, has developed into a selling pastis, an alcoholic anis-to the French case scene has noth-billion-dollar business. While it has based drink, it has been steadily of public worry over health and ing to do with champagne, beer or had little impact on the market for expanding into the nonalcoholic diet than of simple monetary conmineral water. It is Brut de Pomme, premium wines and champagnes, it beverage market since 1975 and is cerns. They point to the vignette, a stiff 10-franc (just over \$1 at current rates) social security rax instituted by the government last year

on all soirits with more than 25 percent alcohol "The vignette was a very, very heavy tax for French people," Mr. Lamy said, adding that taxes on spirits of more than 25 percent alcohol account for 77 percent of their cost, compared with 55 per-

cent five years ago. So far, however, beer and wine consumption has remained almost unaffected by the tax. According to the Confederation des Associations Viticoles de France, the French table wine union, table wine consumption has continued its fiveyear free fall, from 38.5 million hectoliters in 1978 to 31.5 million

last year. And according to the Union Générale des Brasseries en France, which accounts for 50 percent of French beer production, overal beer consumption has remained at 22.4 million hectoliters during the same period.

Meanwhile, producers of premium alcoholic beverages are calmly going their way. A spokesman for Moet Hennessy, asked whether the producer of fine champagnes and cognacs would consider venturing nto the soft drink market, said: "Absolutely not. We're staying right where we are."

(Continued from Page 13) on to Chicago and New York as the + how trading day is transformed from an informal to a structure.

Meanwhile, Ferdnand Prisi. to and Funnes Association in Geneva and president of Consolida trying to avoid any further problems between his fellow bank-ext and the foreign brokers in a specially Swiss manner:

Mr. Prist's association has an international institute in A 10 train both foreign and tkers and prokers in finanand stock-index futures and ous markets,

subsidiary of Mannesmann AG, West Germany's largest coal-minwas awarded jointly by Occidental Petroleum Corp. and the Colombi-

holders. The two, who control 18

and International Management & ing concern, to 40 percent from Engineering Group Ltd. of London 27.2 percent. Vereinigte Elektriziwon a \$170-million contract to taetswerke Westfalen AG also rebuild a 215-kilometer (133-mile) oil ceived shareholders' approval to pipeline in Colombia. The contract lift its stake to 22 percent from 0.2

Centrals Eletricas Brasileras SA, an state oil company, Eco Petrol. PLC said bid acceptances have in-sown as Eletrobras, has raised a Pay a Save Corp. directors Sam-creased its stake in ICL PLC to 15-billion yen (\$61.2-million) nine uel N. Stroum and Stuart Shoan 367.9 million ordinary shares or said they may make a proposal to 81.4 percent, and the STC offer is tyo Ltd. said. The first tranche is acquire the company or "otherwise now wholly unconditional. It said for 9 billion yen at 1.625 percentage generate a better deal" for stockits offer will remain open until fur-

percent, last week voted agams a plan for the company to be acquired by investors led by Trump to buy up to four million common shares of Hamilton Oil Corp. at \$19.50 each. The plan is in line with food Holdings, is making an agreed-upon bid for Lennons approved a bid by the diversified said. Volvo North America currency PLC on the basis of two Dec energy group VEBA AG to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and to intend on the basis of two Dec energy group VEBA and the basis of two Dec energy gr

Thesingle most important reason to choose The Waldorf = Astoria.

Excellence.

CORRESPONDENT BANKING IN THE FINEST ROYAL TRADITION

# Hypo-Bank's COMMITMENT TO MUTUALLY REWARDING CORRESPONDENT BANKING

Banks with special cross-border needs value correspondents equipped not only to handle routine transactions with speed and efficiency, but also committed to building mutually rewarding relationships.

Hypo-Bank offers all the correspondent services you would expect from Germany's oldest joint-stock bank and one of the nation's leading financial institutions with consolidated assets of more than DM 97 billion. From payments and collections and L/Cs to reliable market information and advice on new business opportunities.

Headquartered in Munich, the commercial and financial hub of Bavaria's rapidly growing technology-based economy, Hypo-Bank operates Southern Germany's largest branch network and is present in the decisive centers throughout the country. Foreign branches are in London and New York, and representatives are active in key international markets to foster long-term relationships with our clients.

Founded in 1835 by King Ludwig I of Bavaria, Hypo-Bank has a service tradition to live up to. A reputation for royal client treatment and added value for our correspondent banking partners.

To find out more Labout Hypo-Bank's approach to correspondent banking, get in touch with us at: Theatinerstrasse II, D-8000 Munich 2, Phone: (089) 2366-1, Telex: 5286525-27

# A Fed Governor Says **Markets Misread Policy**

By Peter T. Kilborn

The state of the s

\*\* 1.5 (s)

UME

المناوع من

New York Times Service
WASHINGTON — A governor of the Federal Reserve Board said that nothing in the Fed's current policies could explain rises since late August in an important interest rate that influences all other

The governor, J. Charles Partee, left the impression that the central bank's policy-making committee agreed at its meeting Aug. 21 and 22 to maintain its current posture on interest rates, bank reserves and

the money supply.

The early-August railies of the stock and bond markets fizzled one another. partly because investors interpreted minutes of the July meeting published Aug. 24, as signaling a tougher Fed policy. Minutes of the August meeting are not expected until early next month.

At the July meeting, the Fed raised its ceiling for the federal lands rate, which banks charge one another, to 12 percent from 11½ percent.

Some analysts contended the decision merely confirmed a trend already apparent in the market-place. Others contended that, in endorsing the higher rate, rather than deciding to try to force it back below 11½ percent, the Fed had tightened its restraints.

In an interview, Mr. Partee, a consistent member of the majority of the 12-member Federal Open Market Committee, suggested that the latest-rate increases resulted from nervousness within the banking system that had persisted since the run on Continental Illinois National Bank in May and had been exacerbated by the more recent difficulties of Financial Corp. of

Last week the funds rate fluctuated between 11% and 11% percent. "Nothing from our position could put the Federal funds rate up," Mr. Partee said. "It must be because of a change in market circumstances. I guess banks are be-

ing more cautious." Last week the Fed pumped up the banks' reserves, which adds to the funds available for lending. Some analysis have interpreted this to mean the Fed is concerned by the rise in the Fed funds rate, and

Mr. Partee's remarks appear to re-

flect that concern. The Fed's role in the economy is unusually sensitive now because of the presidential campaign. Overt action to slow or stimulate the recovery could lead to charges of partisanship and, eventually, new controls over the Fed's freedom to set monetary policy without the participation of Congress and the administration. But in trying to discourage partisan criticism, the Fed has confused the market over its actual intentions.

Federal funds are unsecured, overnight loans that banks make to

Most federal fund loans are made to big banks by smaller banks, whose reserves often far exceed the Fed's requirements. The Fed can influence the rate by modifying its reserve requirements, but the banks themselves affect it, 100, by the amounts they are willing to make available for lending.

Normally banks lend readily to one another, but the Continental affair has made some jittery in their willingness to lend to some that are known to be burdened with problem loans. "It's very unusual for that to happen in the banking sys-tem," said David Jones, economist at Aubrey G. Lanston & Co.

Mr. Partee said that he had seen no signs in bank lending that would suggest rising demand for funds and thus higher rates.

"The level of borrowing has remained at the level of \$900 million to \$1.1 billion for weeks," he said. He said the pressure on the Fed funds rate might have been coming instead from a reluctance of some banks to lend to others and from some troubled banks' difficulties in raising funds by issuing certificates of deposit at desirable rates, so that they have been relying more on the Fed funds market.

Some credit market analysts say additional pressure on the rate arises from a reluctance by banks to borrow directly from Fed. The Fed's discount rate of 9 percent is unusually attractive. But bank investors and depositors could interpret such borrowing to suggest a bank is having difficulty raising funds.

# **Other Economies** Said to Lead U.S.

Reuters NEW YORK — The combined index of leading indicators for the six major industrial economies outside the United States is rising faster than the U.S. index for the first time since the current economic upswing began, the Conference Board said Monday.

A board survey shows the composite leading index rising at an annual rate of 7 percent. against 5 percent for the United States. The research group made up of business leaders said Japan's indexes are rising at an annual rate of 11 percent.

Indexes are advancing at 7 percent in France, 6 percent in Italy and West Germany, 5 per-cent in Canada and 2 percent in the United Kingdom.

# Japanese Companies Expanding Work on Microprocessors

(Continued from Page 13)

computers. Many companies and government laboratories are inves-tigating gallium arsenide, a materi-al that can be used instead of sili-con to make faster circuits. The U.S. military has already expressed interest in acquiring Japanese gallium arsenide technology.

If there is one area in which the

Japanese clearly lag, however, it is in designing circuits with new func-tions. It is for this reason that NEC's microprocessor efforts will be closely watched. Until now, Japanese companies

have generally made microproces-sors based on American designs, either by licensing the designs or

simply copying them.

But in a sign of the changing times, Zilog Inc. — a U.S. company that a year ago accused NEC of copying its chips — has agreed to be the second source for NEC,

der license from NEC. NEC faces great challenges be- ble with the IBM machine, meancause it is a late starter. It is only ing they want to use Intel procesnow starting to ship samples of its sors. Most of the rest of the 16-bit 16-bit microprocessors, which have microprocessor market is held by

BOOKS

THE REST OF US: The Rise of America's Eastern European Jews

By Stephen Birmingham. 392 pp. \$19.95. Little, Brown, 34 Beacon Street, Boston, Mass. 02106.

Reviewed by Walter Goodman

HAVING celebrated the German Jews of New York in "Our Crowd" and America's Sephardic Jews in "The Grandees," Stephen Birmingham turns now to the Jews who went to America from Russia and Poland between 1881 and 1915. But the resemblance of "The Rest of Us" to Irving Howe's memorable "The World of Our Fathers" is less than the dust jacket suggests.

Birmingham is not so much a historian as a retailer of anecdotes about fabled characters. Most of his book is devoted to Samuel Goldwyn, the movie mogul; Samuel Bronfman, the liquor baron; David Sarnoff, the radio pioneer, and Meyer Lansky, the reputed mastermind of

Many of the tales are entertaining, even when familiar, like the one about the young Sarnoff clicking away at the telegraph key hour after hour, bringing the news of the sinking of the Titanic to the world. And although you may have heard Goldwynisms before, lines like "Let me pinpoint for you the approximate

date" bear repeating.

Some of the anecdotes may even be true, but this merchandise carries no guarantees. Its suppliers knew these colorful figures in years past, and the years do burnish memory. A main supplier, for example, is Samuel Goldwyn's second wife, Frances Howard Goldwyn, whose recollections place her and her late husband in

an unremittingly kind light.

For his perfunctory chapter on the Hollywood blacklisting of the 1950s, Birmingham relied to some degree on Lillian Hellman, so you will not find in these pages anything about her political attachments other than that she wrote "Watch on the Rhine." Birmingham might have benefited from Sam Goldwyn's advice to take certain things "with a dose of

The prose style is breathless and predictable: "His name was Samuel Bronfman." "Her name was Helena Rubinstein." The namedropping can get drippy. At the apex of a list of famous folks who came out of the East Side, he places "a pretty New York girl named Betty Joan Perske, who, after being educated at the high school on Second Avenue and 67th Street . . . went on to Hollywood and Broadway stardom as Lauren Bacall." Some of these pages call to mind a game that Jews have been

known to play among themselves: Did you realize that Theda Bara was Jewish? How about Paulette Goddard?

By the end of the book, the descendants of the huddled masses have moved in on the country clubs and Reform temples of their German Jewish forerunners, some of whom had been dismayed by the newcomers' manners. Although the Goldwyn-Bronfman-Lansky ascent up the golden ladder is not exactly representative of the Eastern European crowd, their careers do correspond to the early and interesting days of Hollywood, Las Vegas and the house of Seagram. Birmingham, a practiced blender and packager of spirited stories, credits Bronfman and the exigencies of

bootlegging with the inspiration for blended

Perhaps these newcomers who made it so big in America were drawn to chancy enterprises because few others were available to men of their temperament and talent. If Birmingham were contending that the handful of not overly scrupulous men portrayed here exemplifed the many working stiffs who labored long in sweatshops for bare livings, he would probably be sued by the Anti-Defamation League. But his choice of case histories rests on no premise more substantial than entertainment. He is readily diverted by a lively scene, rather like the young Meyer Lansky, who was distracted from his family errands by the crap games

along his route.
Yet Birmingham knows what he is about His good sense in avoiding weighty matters is confirmed by his occasional gropes in that direction: "So perhaps one of the things that made Sammy run was the searing inner doubt — a guilt that wouldn't go away — about the worthiness of success, a very real fear that success was evil, ungodly. Assimilation was not free. One of its prices was constant inner conflict, a crisis of conscience, a divided soul." It's an invitation to flip on to the next amusing

Stone Age Site Discovered in England

The Associated Press EXETER, England — Aerial photographs of drought-stricken fields have revealed a Stone Age site of a circular monument, possi-bly used by sun worshippers 1,000 years before the Stonehenge ring. Unlike Stonehenge, which is made of stone, the 5,000-year-old site is thought to have been constructed of huge upright timbers with bases set deep in the ground. It is on the banks of a stream on the northeast boundary of Dartmoor.

"Once it NEW YORK - John McEnroe French Open, when the tempera- caught the net, I knew it was someused his battery of serves and volumental explosions that have where in that area, so I just adjust-"No matter what left-hander you

find in the world," said Lendl, who has now lost three straight finals here, the first two to Connors, "none of them is going to serve and volley like McEnroe."

At the start, McEnroe lugged "I learned certain things about himself around the court as if uning serves as if desperate to play the McEnroe gained the one break

for you. Let me tell you, life is not and he served out the next game a fun when you're banging your head love, finishing with an ace to the against a brick wall all the time." nearly invisible from a courtside seat. On his next service game, gun-ning for the set, he again held at love with three thunderbolt serves. In the second set, McEnroe's one

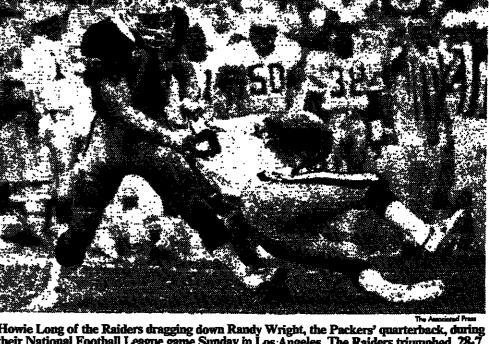

break came in the seventh game, but it was in the sixth that he most demonstrated his genius. He served to a 30-0 lead, but Lendl climbed back on one of McEnroe's six double faults and his own backhand cross-court winner. Then, rather than blasting the ball at Lendl, McEnroe offered a change-of-pace serve that caught him unaware. The game point was an ace, one of eight for McEnroe in the match, and it was even slower than the serve be-

McEnroe raced to a 4-0 lead in the third set with two breaks, eager to "get in the driver's seat so I didn't do what I did in Paris." Lendl continued to play avidly, unlike in his final against Connors last year when he lost the advantage with a double fault at 5-4 in the third set and never won another

By winning the French Open, in which Lendl could never break Lendl deprived McEnroe of a serve. Lendl had a break point after chance for a 1984 Grand Slam, McEnroe had double-faulted in the with the last of the four major toursecond game of the second set. On naments to be played in Australia the next point, with McEnroe at the in December. In Houston, Mike Pagel threw three touchdown passes, two to Ray Butler, to lead Indianapolis to 35-21 triumph over Houston.
Pagel's first touchdown pass of the season, a 31-yarder to Butler with 72 seconds left in the first half, ive the Colts a 21-14 lead. He hit Butler again for 14 yards in the third quarter and connected with

the fourth quarter. Pagel completed 15 of 20 passes for 215 yards in directing the Colts to their first triumph of the season.

Tracy Porter for a 33-yard score in

Raiders 28, Packers 7 In Los Angeles, Frank Hawkins, Marcus Allen and Derrick Jensen rushed for second-half touchdowns to help the Los Angeles Raiders

down Green Bay, 28-7. In improving to 2-0, the Raiders shut down Green Bay's explosive receivers by limiting John Jefferson to three catches and blanking James Lofton. Green Bay, which used three quarterbacks, fell to 1-1.
Randy Wright, a rookie from
Wisconsin, replaced Lynn Dickey
early in the first quarter after Dickey left with a bruised back. Rich

Campbell took over for Wright in the fourth quarter after Wright tossed two interceptions.

Rams 20, Browns 17 with 1:25 remaining in the game to give the Los Angeles Rams a 20-17 victory over Cleveland. The Rams are 1-1 while Cleveland fell to 0-2.

The game-winning drive was highlighted by the running of Eric Dickerson, who came back from a dismal, 8-yard first half to finish with 102 yards in 27 carries to lead all rushers.

Dolphins 28, Patriots 7 In Miami, Dan Marino tossed a pair of touchdown passes to Mark

Clayton within a 1:36 span of the third quarter as Miami broke away from a halftime tie and went on to bury New England, 28-7. Marino, who threw five touch-

down passes in Miami's season-opening 35-17 victory over Washington, teamed with Clayton on a 38-yard bomb with 12:38 remaining in the third quarter and capitalized on Charles Bowser's fumble gled home Junior Noboa with the recovery 1:36 later, this time connecting with Clayton on a 15-yard scoring pass.

In Atlanta, Ed Murray drilled a

In New Orleans, Richard Todd hit on two long passes in the final 2:35 of play to lead New Orleans to a 17-13 victory over Tampa Bay.

The first one was a 24-yard completion to Tyrone Young. The second was a 51-yard pass play to fullback Hokie Gajan that put the ball at the Tampa Bay 13-yard line.

### Eagles 19, Vikings 17

In Philadelphia, Ron Jaworski threw a 1-yard touchdown pass to tight end John Spagnola with two seconds left to give Philadelphia a 19-17 victory over Minnesota after a penalty gave the Eagles new life.

The Vikings appeared to have stopped the Eagles when Wilbert Montgomery was tackled short of the end zone on a fourth-down run. But Minnesota was assessed a facemask penalty, giving Philadelphia another chance.

### Giants 28, Cowboys 7

In East Rutherford, New Jersey, Andy Headen dashed 81 yards with the first of two Gary Hogeboom fumbles caused by linebacker Lawrence Taylor, and Phil Simms fired three touchdown passes to lead New York to a 28-7 rout of mistake-prone Dallas. Simms, who threw for 409 yards

and four touchdowns last week Rams 20, Browns 17 against Philadelphia, completed 10
In Anaheim, California, Ron of 20 passes for 185 yards, and Rob

### Cardinals 37, Bills 1 In St. Louis, Ottis Anderson

scored two first-half touchdowns and Neil Lomax threw two scoring passes to lead St. Louis to a 37rout of Buffalo.

Anderson rushed for 83 yards in 20 carries to raise his career total to 6,324 yards, 17th on the all-time list. The 27-year-old Anderson is the youngest member of the top 20

### Bears 27, Broncos 0

In Chicago, Walter Payton scored on a 72-yard touchdown run - the longest of his career - and broke Jim Brown's career combined yardage mark with 179 yards rushing to lead Chicago to a 27-0 victory over Denver.

Jim McMahon bit Willie Gault on a 61-yard scoring bomb, and Bob Thomas became the Bears' alltime scoring leader with two field

In Cincinnati, Todd Blackledge passed for two touchdowns and Nick Lowery kicked a 40-yard field goal with 1:50 remaining to seal

ing with foreign players is being standardized. A rule introduced last year made it mandatory for all contracts to be filed with the league • Keeping time elapsed on the shot clock office. A special NBA-style draft also was instiwhen a ball goes out of bounds, rather than tuted last year including all players with experience in Italy. And this year it was expanded to

"It would be taking too much away from the weaker teams," Borelli said. "The zone is the great equalizer, it's the only way they can hope to win."

The league nopes to nave a trait mentioning me U.S. pro and college ranks in the future, although officials acknowledge that the circuit is advantage of the more open game. Each team not yet in a position to compete with the NBA's money or prestige. The league hopes to have a draft including the

Washington — The issue thers of the Constitution deliberately set out to keep state and reliand state has reared its head in the gion separate. Well, I'm holding a 1984 presidential campaign. It may copy of the Constitution in my not be good for the state but it's not bad for television preachers.

My favorite, the Right Reverend Rolls-Royce, devoted his entire you send \$10 for postage costs and hour to this subject the other morn-

"I'm going to speak to you today about God, sin and the American election. The secular humanists would have you believe that religion must not play a part in governmeni — that we should not mix

聚 🛵 religion when it Buchwald

comes to reelecting the greatest president on this good green globe.

"Well, my friends, the Bible has something to say about this. What does the Bible say about state and religion? You can find out by sending \$50 for this velvet-bound illustrated edition, which we have printed at cost, to guide you in making what could be the greatest decision of your life. For those of you who can't afford this beautiful goldtrimmed book, we are offering a paperback edition for \$15, so no one can say that he or she wasn't informed on the issues.

Do religion and government mix? Well, I'm going to tell you a story. A man came to me last month and said he didn't think he was better off today than he was four years ago. He had lost his job, his benefits were running out and he could hardly feed his family on the food stamps that he was receiving. He told me because of his precarious situation he was confused and didn't know whom to vote for in November.

"I told him when he goes into the voting booth, he must not think of his own petty problems. He must decide which party's platform supports God and which party's platform supports Satan. I gave him copies of both parties' platforms. Do you know what this man did after reading them? He gave me his last \$5 for a Reagan humper stick-

"The aggressive humanists

hand, the most beautiful political document ever devised by man. This document can be yours free, if handling. It is printed on parch-ment with the First Amendment in bold red type. Whenever a humanist cites the Supreme Court on keeping religion out of the govern-

ment you can show him this document to prove the Supreme Court justices are wrong. "My friends, too many of us take it for granted how blessed we are to live in a country under God. We're

afraid to show our true feelings. But we have to shout to the world that we're the greatest so it can be heard all the way to the Kremlin. You may be asking how you can do this. You can do it by displaying this American flag, For just \$100, you can hang one of these flags in your window. I have personally blessed each of them, so you're not just buying an American flag, but one that was touched by God's

"Don't just sit there and let the secular humanists turn this country into a Communist state. Go to your phones now and call this toll-free number. If God didn't want you to have this flag he wouldn't have let me accept your American Express, MasterCard or Visa cards.

"I want to conclude this broadcast by telling you about the won-derful prayer breakfast I attended in Dallas where I heard the inspirational words of our great president.
After the breakfast I went up to our Commander in Chief on Earth to bless him. I would like to share that moving moment with you. My wife Lulubelle took an Instamatic photograph of the president shaking my hand. If you will send just \$20 we will mail you a framed copy of that picture, which you can hang in your living room to show your friends. It is something you will cherish for the rest of your life. This is a collector's item and the only picture in existence of Ronald Reagan and myself. The offer is limited to the first 50,000 people who send in their checks. After that we will burn the negative and no one will be able to reproduce this miracle photograph again."

# A New Day A-Borning on the Erie Canal

By Edward A. Gargan New York Times Service PITTSFORD, New York — Dale Hatch, the chief lock operator, twisted two gleaming brass levers, and three million gallons of water began rushing

into Lock 32, raising two tug-

boats gently to the next level of the Erie Canal. Hatch is a canaller, like his father and grandlather before him, and one of 35 lock operators along this 340-mile (550-kilometer) stretch of fluid highway.

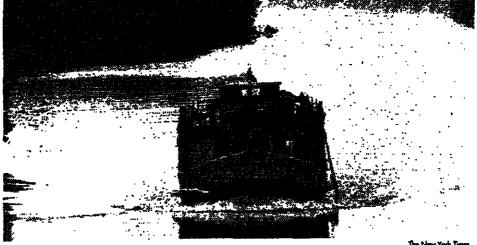

To Hatch, the canal that Governor De Witt Clinton opened in 1825 is a "grand old lady." It is a place where a youngster can squat on its bank, fishing pole in hand, where molasses barges chug toward Toronto, and where tourists travel on latter-day packet boats. It is also the place where electricity is made, where the vanishing fraternity of lock keepers polish brass electrical switches made 70 years ago and where the state's first urban cultural park is

And now, the canal that Clinton opened — "a bond of union between the Atlantic and Westem states, it may prevent the dismemberment of the American empire," he said at the time has become a place for change once again.

Although commercial activity

stalled yesterday.

on the canal system continues to decline, a \$50-million, five-year rehabilitation of the waterway such as upgrading locks, dredging and reconstructing some banks
— has been started by the state.

And even as pleasure boaters meander along the waterway, state and private developers are in the midst of transforming its sleepy waters, at an ultimate cost of \$2.5 billion, into a pincushion of small hydroelectric projects that will produce 200 megawatts of electricity by the end of the century. Though it will account for but a fraction of the total state energy needs, these small projects will ultimately displace more than two million barrels of oil a year, state officials say.

Today, the Erie Canal — to-gether with the Champlain, the Oswego and the Cayuga-Seneca canals - bind New York together with 527 miles of waterways under the anachronistically named New York State Barge Canal. It is not the ditch of Clinton's day, although the canal that cuts from Albany to Buffalo parallels the route of the old Eric. Last year, while there were 25

percent fewer barges carrying jet fuel, asphalt and molasses along the canals than there were in 1982, the number of pleasure craft going through the 57 locks increased nearly 14 percent, reflecting a continuing shift in the use of the canals. But to Hatch, the Erie Canal is

special for a variety of reasons.

"The canal is for everybody," said Hatch. "The canal is for navigation, but it isn't just for agency will spend \$13.5 million this year to operate the locks. dredge sections that silt in and maintain the banks of the waternavigation. It is for water management. It's for flood control.

Deferred maintenance oc-It's for irrigation and recreation. curred on the canal, and we're "This system was built to last. playing catch-up," he said. When it was built, the Erie Ca-These locks were built to last a long time. There was no such nai charged toils. By 1882, it had earned \$134.9 million in tolls, a thing as built-in obsolescence."
Hatch's kingdom is Lock 32 sum that paid off the original bonds to build the canal and a 325-by-45-foot lock (100-by-13 meter), a lock master's house, two leave a profit of \$42 million. That white frame lock houses and the year, voters amended the State electrical and mechanical ma-Constitution to eliminate the chinery that opens and closes 40-

ton lock gates. It all was built in Among the more fervent canillers is Peter Wiles, captain of the Emita II, which every summer takes passengers the length of the canal

"You don't care where you're going," he said, sipping coffee from a mug in the pilot house as the Emita II puttered westward, three days out of Albany.

"This thing," he said, gesturing toward the channel of brown water that stretched before him, "is where the very wealthy and the not so wealthy come. There's a spot for everybody. There's nothing mechanical this big, this old. that still operates."

A great blue heron, its wings flapping lazily, glided in front of the boat.

"There's a really old story that herons are old river-boat pilots," the captain said. "They fly off and land in shallow water to tell pilots not to steer there."

# Alf Landon Reaches 97

ty patriarch, celebrated his 97th ing elk hunting," birthday Sunday with a telephone greeting from President Ronald Reagan, who called him a "folk hero." Landon, who marked his birthday with a lawn party thrown by Kansas Republicans at his home in Topeka, Kansas, responded by saying: "In all my 97 years I don't know of a president who has occupied such a strong, stout-hearted position of leadership that you do." Landon recovered from surgery for a broken hip last year. He is probably best remembered for his defeat in the 1936 presidential race by Franklin D. Roosevelt, in which be failed even to carry his home state.

Ingernar Stenmark, a three-time World Cup overall skiing champion and winner of two gold medals at the 1980 Winter Olympics, has married the former airline hostess with whom he has been romantically linked for five years, according to a report released Monday. The Swedish skier, 28, apparently didn't tell his parents about his marriage in a Stockholm suburb last Friday to Ann Uvingen. "Well, they didn't tell me when their child was born last spring either." said Erik Stenmark, his father. "And

Lady Norsh Docker, a car sales." man's daughter who married threemillionaires and enlivened Britain's gossip columns in the 1950s, left only £39,650 (about \$50,355) in her will, which was published Monday "She spent the lot," said her only child. Lance Callingham, 45, Lady Docker and her third husband, Si-Bernard Docker, an industrialist drove in a gold-plated Daimler and threw lavish parties on their yacht. Sir Bernard died in 1978, and his wife died in a London hotel last December at 76.

Prime Minister Margaret Thatcher of Britain and her husband. Denis, have put their London home in the fashionable Chelses district up for sale and are asking at least £250,000 (about \$317,000) A spokesman for real estate agents Keith Cardale Groves said Saturday the four-bedroom house, where the Thatchers have lived for 15. years, is "an exceptional family home that has been extremely well maintained." He said he didn't expect any difficulty in selling the property, adding: "The identity of the former owner might help the
